Loxwood Neighbourhood Plan

2013 to 2029

YOUR PLAN FOR THE FUTURE OF LOXWOOD PARISH

Loxwood Post Office
John Murray Family Butcher

Laxwood Primary and Junior School

Wey and Arun Canal
Executive Summary

This Neighbourhood Plan sets out the vision, objectives and policies for the growth of the Parish of Loxwood over the period 2013 to 2029.

The Neighbourhood Plan has been drawn up by a Steering Group made up of parish councillors and local residents working under the auspices of Loxwood Parish Council.

The Neighbourhood Plan sets down a series of planning policies which, once adopted by means of a parish referendum, will form part of the Chichester District Development plan.

The policies are summarised as follows:

i. Housing allocation together with community benefit on defined housing sites.

ii. Definition of the Settlement Boundary for the village of Loxwood.

iii. Introduction of a street lighting policy.

iv. Measures to address potential flood risk and sewerage problems.

v. Development of a policy for the rural area which defines support for the expansion of existing businesses, agriculture and new business start-ups.

vi. Housing density, the built vernacular and house extensions are addressed in a way that seeks to protect the built heritage of the parish.

vii. A policy on traffic calming is introduced which sets out a strategy for dealing with speed through the village of Loxwood and with the identified safety risks for pedestrians.

viii. Internet and broadband connectivity is addressed seeking to make sure that any new development is configured to maximise the ability to connect to the local network.

ix. The Wey and Arun Canal Trust vision of a through navigable route from the Wey to the Arun Rivers is supported.

x. New retail/business start-ups are supported provided it can be established that such new enterprises are viable, support the local economy and are not detrimental to the local environment.

xi. A green policy is introduced which seeks to ensure that any new housing and/or extension meet the highest standards of design and energy usage together with the use of green technologies.

This Neighbourhood Plan has been reviewed by residents and key stakeholders through an extensive consultation process. All comments and suggestions received as part of this consultation have been carefully considered and the Neighbourhood Plan amended accordingly.

The Neighbourhood Plan is now subject to an Independent Examination and will finally be subjected to a local parish referendum requiring a majority “yes” vote of all those voting in the referendum for it to be accepted. In the event of a “yes” vote, Chichester District Council will proceed to “make” the Neighbourhood Plan for Loxwood Parish.

The policies will be reviewed every 5 years and, if necessary, changed to keep them up to date.

1. **Introduction**

Welcome to Loxwood Parish Council’s proposal for a Neighbourhood Plan.

1.1. **What is a Neighbourhood Plan?**

Neighbourhood Plans and Neighbourhood Development Orders were introduced by the 2011 Localism act. Neighbourhood Plans allow local communities to have a say in developing how their community will grow over a 15-year period. The Plan allows the community to choose where they want new homes, shops and offices to be built, to have their say on what those new buildings should look like, whilst at the same time, protecting the landscape and character of the parish.

1.2. **The Neighbourhood Plan must be in general compliance with Chichester District Council (CDC) Local Plan policies, the National Planning Policy Framework, EU obligations and human rights requirements.** The Neighbourhood Plan, once adopted, forms part of the CDC Development Plan. Its policies will work alongside, and where appropriate, replace the policies in the CDC Development Plan.

1.3. The Loxwood Neighbourhood Plan will be reviewed every 5 years to ensure compliance with national and local planning requirements and to reflect the changing needs of the local community.

1.4. **The opportunity has also been taken to incorporate the Loxwood Village Design Statement (VDS) into the Neighbourhood Plan, thus obviating the need to update two separate documents.**

1.5. **The Neighbourhood Plan also incorporates many of the elements of the Community Led Plan (CLP), where this relates to the future development of the parish. The evidence base in support of this Neighbourhood Plan contains reference and support documentation including the Basic Conditions Statement and CLP. This can be found on the Loxwood Parish Council web site at:** [http://www.loxwoodpc.co.uk](http://www.loxwoodpc.co.uk).

2. **Background**

2.1. **The Loxwood Neighbourhood Plan has been compiled by a Steering Group comprising 4 parish council members and 5 local residents, working under the auspices of the Parish Council.**

2.2. **Work first started in 2011 on a Community Led Plan with a series of village workshops and open days in 2012, which sought the views of the community on a range of issues such as tourism, traffic, transport, housing, sport and leisure etc. The consultations were led by The GlassHouse, a firm of consultants who specialise in facilitating community engagement. The findings from the workshops, together with a copy of the consultant’s report, can be found on the village web site under the Community Led Plan tab.** [http://www.loxwoodpc.co.uk](http://www.loxwoodpc.co.uk)

2.3. **The success of the community engagement then allowed the Steering Group to formulate a comprehensive village survey, which was launched in September 2012. Action in rural Sussex (AiRS) was engaged to analyse the results of the survey and to produce a report. The results of the survey were fed back to the village at an Open Day in January 2013. The report together with the short, medium and long term actions stemming from the survey are also available on the village web site.**

2.4. **The first step in producing a Neighbourhood Plan is the establishment of the “Plan Area”. This was agreed by CDC in March 2013. The Neighbourhood Plan policies will only apply to the Loxwood Parish Neighbourhood Plan Development Area. See figure 1 on page 6.**

2.5. **The housing, traffic, transport and infrastructure aspects of the survey were then carried forward into the evidence gathering phase of the Neighbourhood Plan. The comprehensive evidence base compiled by the Steering Group is available on the village web site and is in part contained within the Neighbourhood Plan document. The evidence base has been scrutinised by the consultants, URS, who have also provided advice on plan policy writing and on housing site allocations.**

2.6. **The Neighbourhood Plan has been subjected to extensive consultation within the parish and with key stakeholders. It is a plan for the future of Loxwood over the next 15 years. All respondents’ views have been analysed and, where appropriate, taken into account. For various reasons it has not been possible to incorporate everyone’s wishes. A Consultation Summary of comments is available on the parish web site.**
Loxwood Parish Neighbourhood Plan Development Area

Figure 1
3. **Independent Examination**

3.1. An Independent Examination will be carried out by an Examiner appointed by CDC.

4. **Referendum**

4.1. A Referendum as required by the Neighbourhood Planning Localism Act will be carried out following the Independent Examination.

5. **Vision and Objectives**

5.1. **Vision**

During the Community Led Plan workshops, work was undertaken to establish a “Vision” for Loxwood parish. During these workshops, the past development of the parish was reviewed and likes and dislikes established. It was accepted by those who attended the workshops that, over the plan period, growth in terms of housing was inevitable and, indeed, would be essential if a thriving community was to be maintained.

A vision statement was thus established as follows:

“To maintain Loxwood as a semi-rural parish, yet one which welcomes incremental change that will sustain and enhance its facilities and character and contribute to a greater sense of community and neighbourliness.”

5.2. **Objectives**

Analysis of the information and data gathered from the Neighbourhood Plan evidence base, the Community Led Plan workshops and the parish survey conducted in September 2012 has enabled the Steering Group to establish a set of objectives for the Plan period of 2013 to 2029. These objectives will be used to define the Plan policies.

The objectives are as follows:

a. To promote sustainable housing development through limited and controlled growth on allocated sites in accordance with the Chichester District Council Saved and Emerging Local Plans policy 5 and the National Planning Policy Framework.

b. To ensure that the housing on the allocated sites provides an integrated mixture of open market housing and affordable housing to include the young and elderly.

c. To ensure that the affordable housing element of new housing is prioritised for people with a defined local connection to the parish of Loxwood.

d. To ensure any new housing and/or housing extensions reflect the established vernacular of the parish in terms of building styles and materials; and to enhance and protect designated listed buildings and those buildings of an historic and architectural interest to the parish.

e. To establish a revised Settlement Boundary (SB) for the village of Loxwood.

(Note – the term Settlement Policy Area, or SPA, has been replaced by “Settlement Boundary” (SB) within Chichester District Council’s emerging Local Plan)

f. To establish a parish rural housing policy for development outside the SB.

g. To establish a safer environment for pedestrians and cyclists as well as motorists within the village and parish of Loxwood.

h. To ensure that the sewage and surface water provisions are fit for purpose and are upgraded commensurate with any increase in demand.

i. To promote the concept of a village centre with facilities for people to meet and relax together with the possible provision of further retail outlets, all provided as part of a mixed housing development in a central location.

j. To ensure that all new developments within the parish are configured to optimise high-speed fibre optic broadband connectivity.

k. To promote business activity within the parish and, if demand requires, establish business work units.

l. To conserve energy and limit light pollution in all new developments.

m. To support the long term vision of the Wey & Arun Canal Trust of a through navigable route from the Wey to the Arun rivers.

n. To identify and protect the areas of green spaces which are important to the parish.

o. To promote the use of energy efficient technologies in the early design stages of all new developments.
6. The Parish of Loxwood

6.1. Location

a. Loxwood parish is located in the North East part of Chichester District (see Figure 2 below) adjacent to the border with Surrey. It lies outside the boundary of the South Downs National Park and is made up of the village of Loxwood together with the hamlets of Alfold Bars to the North and Roundstreet Common to the South. The parish includes several local lanes such as Oakhurst Lane, Pigbush Lane, Brewhurst lane, Skiff Lane and Drungewick Lane.

b. The B2133 runs through the village of Loxwood and acts as a “rat run” for commuters between the A281 and the A 272.

c. The Wey and Arun canal runs East/West through the southern part of Loxwood.

d. Along with the parishes of Kirdford, Wisborough Green, Plaistow and Ifold together with a small part of Lynchmere parish, the parish of Loxwood forms the northern part of the Plan Area in the Chichester District Council Saved and Emerging Local Plans.

e. Loxwood, along with the other parishes in the north of the Plan Area, is predominately of a rural nature and accessibility to services and facilities is a particular issue - with local residents having to travel significant distances to access shops, employment and leisure facilities.

f. The nearest secondary school is in Billingshurst, some 7 miles distant. Public transportation is extremely limited, with a local bus service providing a “once per day” service to Cranleigh, Godalming and Guildford and an infrequent service to Billingshurst once per day, three times a week.

6.2. History

a. It is thought that there was a settlement at Loxwood during Anglo-Saxon times and the name of Loxwood is thought to have come from a Celtic or Saxon God called ‘Lokka’ or ‘Loxwa’.

b. There are traces of an Anglo-Saxon drove road that connects the village with Wisborough Green and Amberley to the west of the B2133. Before the B2133 was built, this track would have been the main Guildford Road and part of it is still in use today as the bridleway behind Hall House and the Post Office.

c. Originally the land surrounding Loxwood would have been a heavily wooded Oak forest which was partially cleared for farming.

d. Whilst farming forms an important part of Loxwood’s past there have also been industrial
connections. During the reign of Elizabeth 1st, John Carre, the Huguenot, had a glassmaking furnace at Loxwood and is buried in the nearby Alfold Church graveyard. As timber was the primary fuel, Loxwood and the surrounding areas would have been a good location for these furnaces and there is evidence of a number of them in the vicinity.

e. The Wey and Arun canal runs through the village and was built following an Act of Parliament in 1813 backed by the 3rd Earl of Egremont of Petworth House. The canal joined the rivers Wey and Arun making it possible to travel by boat from Littlehampton all the way to London. The canal was intended to carry munitions between London and Portsmouth, but it was completed too late to fulfil this task. However, at its peak in 1839, the canal carried a total of 23,000 tons of commercial goods. Unfortunately its success was short lived, with railways becoming established as the new form of transport and it officially closed in 1871.

f. Religion has been an important part of the village’s history and Loxwood was originally part of the parish of Wisborough Green. One of the oldest recorded buildings is the Old Chapel built in 1404. This was built as a ‘Chapel of Ease’ so the residents of the village didn’t have to make the walk to Wisborough Green and back each Sunday to attend church. Church Cottage in Station road may have been the original chapel before becoming the curate’s house, when a brick built chapel was built in 1820. This was demolished eighty years later when Loxwood Church was opened in 1901.

g. It’s not possible to discuss the history of Loxwood without mentioning the Society of Dependents (also known as Cokelers). They were a small Christian sect founded by Sir John Sirgood in around 1850. The Dependents built their first chapel in Spy Lane and this is still in use today as a religious meeting place, retaining many of the original fixtures and fittings of the time. They were a very industrious group and ran a number of businesses in the village including the Combination Stores which is now the building housing the local butchers and hairdressers in Guildford Road.

h. Since the Second World War, Loxwood has continued to grow with new housing developments in Nicholsfield and a new school in 1967. There have been several later developments such as Farm Close, Willets Way and Loxwood Farm Place, with the most recent being the development of Hall Hurst Close off Station Road.

i. During this period Loxwood has also gained a doctors surgery, sports club, improvements and extensions to the school and an extensive extension and refurbishment of the village hall, North Hall, which was originally opened in 1937.

j. The parish of Loxwood sits right at the top most right hand corner of Chichester District and is in fact nearer to Alfold parish in Waverley, Surrey, than the nearest Chichester parishes of Wisborough Green, Plaistow and Kirdford. Development in neighbouring Waverley district has a direct impact on Loxwood in terms of traffic, education and infrastructure.
6.3. **Facilities**

Loxwood is a thriving Parish and has the following community facilities:

a. **Infant and Junior School** - consisting of 7 classes for age ranges 4 to 11 years, with a net capacity of 175 students. Occupancy level for the year 2012/13 was 99%. Most of the school buildings are of 1950’s construction, built for a 25-year usage. The buildings are now showing their age and are past their intended life span. They have been repaired, re-roofed and extended to their maximum capacity and there is little room for expansion to cope with the inevitable increase in the occupancy level due to the proposed new housing developments within the parish and neighbouring parishes within the catchment area.

b. **Medical practice** - with four doctors and its own dispensary providing a range of medical facilities for the surrounding parishes.

c. **Two pubs** - grade 2 listed Sir Roger Titchborne on the northern boundary of the parish and the Onslow Arms to the south of the village on the bank of the canal.

d. **Village Hall** (North Hall) - recently refurbished and extended to provide meeting rooms, a modern kitchen and bar area together with a children’s play area and a recreational field.

e. **Village shop and Post Office.** – These are deemed essential elements for a sustainable village community especially for the elderly.

f. **Butchers and Hairdressers** - with commercial space above both premises.

g. **Car Servicing Garage** – well established within the heart of the village.

h. **Church and Chapel**- C of E church, St John the Baptist, on Vicarage Hill with attached parish room. The church is part of a united benefice with St. Nicholas church at Alfold and the Rector attends both parish churches. The chapel is the Society of Dependents chapel in Spy Lane.

i. **Loxwood Sports Association** – situated half a mile south of the village centre with a bar, snooker room, squash court and football and cricket pitches.
7. **Ancient Woodlands**

7.1. Loxwood Parish features a number of ancient woodlands as defined by Natural England and these are shown in figure 4 overleaf.

7.2. Of particular interest are the two woodlands depicted within the village of Loxwood as these are either adjacent to or within the Neighbourhood Plan Settlement Boundary (SB).

7.3. An expanded view of these two woodlands is depicted in figure 3 and must be taken into account with respect to any future development.
Ancient Woodland within and surrounding Loxwood Parish

Figure 4
8. **Heritage Assets**

8.1. The parish of Loxwood has 57 listed buildings with approximately half located within the village of Loxwood. The location and details of each listed building can be found on the English Heritage website. [http://www.english-heritage.org.uk](http://www.english-heritage.org.uk).

8.2. Many of these buildings reflect the built vernacular of the parish established over a period of 400 years and this Neighbourhood Plan will seek to protect this heritage.

8.3. Equally, although not listed, other buildings individually and collectively provide character and historic interest to the parish and will be given a form of protection to ensure their character is not destroyed by any subsequent development.

8.4. Likewise, the important spaces that give the essential atmosphere of the parish will also be afforded protection against inappropriate development.

8.5. The Loxwood Village Design Statement gives details of these buildings and spaces and these are listed in Appendix 3 of the Neighbourhood Plan.

9. **Sites of Special Scientific Interest, Conservation Areas, Areas of Outstanding Natural Beauty and National Parks**

9.1. The parish of Loxwood does not currently contain any Sites of Special Scientific Interest (SSIs), Conservation Areas (CAs) or Areas of Outstanding Natural Beauty (AONBs) nor is any part of the parish within the South Downs National Park.

9.2. Any future designated conservation areas will be protected under the Neighbourhood Plan under the appropriate policies.

10. **Wey and Arun Canal**

10.1. The Wey and Arun Canal was built in the early 19th century to provide an internal route for transporting munitions between London and Portsmouth during the war with France. This saved the journey through the Dover Straits running the gauntlet with the French Navy. Unfortunately the canal was completed in 1816, one year after the Battle of Waterloo.

10.2. The canal then had a limited commercial life, cut short by the coming of the railways and eventually the Wey & Arun canal was formally closed in the 1873.

10.3. Restoration of the canal started in the 1970’s with various sections being worked as land owner agreement was forthcoming. By the 1990’s a sufficient length of canal had been restored in the Loxwood area to allow boat trips to be run for charter and pleasure cruises for the general public.

10.4. An office was established at Flitchfold Farm as a Canal Trust Headquarters and a wharf established on the canal by the Onslow Arms pub.

10.5. Money was raised to re-create an aqueduct across the flood plain at the eastern end of the canal close to Drungewick Lane in 2000.

10.6. By 2008 a new road bridge and lock were built to allow the canal under the B2133 and in 2012 a Wey and Arun Canal Visitor Centre was opened on the Onslow Wharf providing public information.

![](image)

*Wey & Arun Canal Visitor Centre*

10.7. The canal restoration has progressed further north with the restoration of Devils Hole and Southland locks. Work recently commenced on Gennets Bridge Lock. This will be the last waterway construction in the Parish of Loxwood before the restoration moves into Surrey.

10.8. The parish will then have over 3.5 miles of navigable canal which provides a useful tourist attraction as well as a linear park for residents to walk, ride and cycle and exercise.
their dogs. Many local people assist with the Canal Trust’s operations or find pleasure from the boat cruises and special events.

10.9. The Onslow Arms pub provides catering services to the boats and has recently developed the garden with picnic tables alongside the canal which attracts many people on fine days.

11. **Farm Land Quality**

11.1. Loxwood parish is located in the “Low Weald” and is characterised by a mix of pasture and medium to small-scale arable land. Land quality is depicted in figure 5.

Map of designated Land Quality – Source Chichester District Council

Figure 5
12. Economy and Business

12.1. The parish of Loxwood is predominantly rural and has no large or medium scale industry other than farming. According to the Office of National Statistics (ONS) Census 2011 figures, the total number of residents in Loxwood of all ages is 1,827. This figure is likely to be higher as of 2013 with the inclusion of occupants of new developments within the parish. The last development in Loxwood was completed in 2011.

12.2. Based on the ONS Census figures for 2011, of the total number of people resident in Loxwood, 1,308 are between the ages of 16 and 74 (72%) and 917 (70%) of these are economically active. Those currently in employment number 885 (68%).

12.3. The remainder are not necessarily “out of work” as this group also includes those who are retired, people who are home based, e.g. Housewives/husbands and carers under the age of 74 and students aged 16 and over in full time education.

12.4. Although classified by the CDC Local Plan as a “Service Village”, the vast majority of economically active adults work away from the village. “Service Villages” are defined as villages that either provide a reasonable range of basic facilities (e.g. primary school, convenience store and post office) to meet the everyday needs of local residents, or villages that provide fewer of these facilities but that have reasonable access to them in nearby settlements.

12.5. The few businesses that exist within the Parish are retail outlets or service based businesses e.g.-

Village convenience store; post office; butchers; public houses; hairdresser; beautician and sports injuries clinic; vehicle repair and servicing garage; car sales business; tree surgery; furniture design.

12.6. Many smaller businesses are home based such as:-

Physiotherapists; musicians; accountancy and book-keeping; landscaping; general building/handyman trades; painting and decorating; cleaning; graphic design; kitchen design; PR/marketing consultancy.

12.7. There are two businesses within the manufacturing sector and these are:-

Skandia Hus Timber Structure manufacturer
Indigo Cabinet Design

These two manufacturing businesses are relatively small and both Skandia and Indigo Cabinet Design operate from outside the Loxwood village boundary as defined in the Settlement Boundary (SB).

12.8. In the current times of economic recession, more and more individuals are working from home with the result that some home base businesses could benefit from the provision of home/work premises, thus allowing a better environment for their businesses.

12.9. The result of this level of economic activity is that the majority of working people in the parish must travel outside the area to work. The Community Led Plan survey conducted in September 2012 indicated of those surveyed and in employment, 14% worked in Loxwood, 28% worked over 10 miles away from their home with 19% working within West Sussex.

12.10. The bus services through Loxwood are limited to two routes and the service is extremely infrequent. Compass Bus Company Route 64/69 connect Loxwood to local villages and Horsham but run only on Tuesday (69) or Monday and Thursday (64) - once on each day in each direction. Compass Bus Service 42 runs only once per day through many neighbouring villages to Guildford, Surrey. The return bus timetable allows a maximum time in Guildford of one hour forty minutes. Thus, vehicular transport is essential for the economic well-being and sustainability of the parish. The 2011 census shows that only 6% of households had no car or van. This then indicates that all future developments of market and affordable houses within the parish should take account of the transport needs of the population with the provision of adequate parking facilities for cars/vans.

Chart 1 below indicates the method of transport to work indicated in the 2011 census.
12.11. The 917 economically active adults within the parish work in occupations spanning 26 employment sectors. The largest occupational sectors are indicated below in descending order of the most people in those occupations.

12.12. Of the residents of Loxwood Parish that are between the ages of 16 and 74, the categories of employment or non-employment are summarised in charts 2 and 3 (source 2011 National Census).
13. Social Characteristics/Demographics

13.1. According to the 2011 National Census there were 1,827 people living in Loxwood Parish. The distribution is shown in Charts 4 ad 5 below in 5 year age ranges and percentage of total.

13.2. The data shows that over 21% of people are aged 65 or over and that there are a similar percentage of younger people under the age of 20 (26%). Only 8% of the population are between the ages of 20 and 30 which suggest that they find it difficult, or do not wish, to remain in the area and thus tend to move away.

13.3. The overall bias for the parish is an ageing population which presents issues over the next 15 year period of the Neighbourhood Plan, as another 23% of residents will achieve the age of 65 over this period. The government’s plans to increase the normal retirement age from 2019 onwards will affect these figures slightly.

13.4. This will place an emphasis on the provision of new housing to meet the needs of the elderly in terms of downsizing, thus freeing up larger houses for sale or rent within the community.

13.5. In order to balance the age profile of residents within the parish, there is a need to provide lower cost housing for the 20 to 30 age group aimed at families, couples and single persons to encourage them to remain within the village.

13.6. The Male /Female split of the population is as follows:-

<table>

</tbody>
</table>

13.7. There are a total of 734 households within the parish. Of these 575 (78%) are occupied by families and 356 (49%) have one or more dependent children. The number of children per family is shown in Chart 6 below:-

13.8. There are 155 (21%) single occupancy households within the parish with 89 (57%) of these occupied by persons over the age of 65.

The make-up of houses within the parish is as follows:-

<table>
<thead>
<tr>
<th>Type of Dwelling</th>
<th>Number of Dwellings</th>
<th>People occupying</th>
<th>% of population</th>
</tr>
</thead>
<tbody>
<tr>
<td>Detached house or bungalow</td>
<td>461</td>

13.9. The above statistics indicate that past development has favoured detached dwellings. However, future development within the parish needs to reflect the demographics shown above which should favour smaller and more affordable housing to accommodate young families. This
will offer the opportunity for them to remain within the parish. The household tenure indicated in the 2011 census was as follows:

<table>

14. Sustainability Appraisal

14.1. Chichester CDC Emerging Plan – Policy 1 and the Local Agenda 21 Strategy - Sustainability Statement defines sustainable development as a need to secure improvements to the economic, social and environmental conditions of the area, also referenced in the NPPF. The community strategy works to improve the economic, social and environmental well-being of the parish and its residents while contributing to sustainable development locally.

14.2. The aim of sustainable development is to create a society where everyone has a good quality of life, while maintaining and enhancing the environmental resources upon which human societies depend. This objective embraces the following sustainability themes:

- Everyone has access to good food, water, shelter and fuel at reasonable cost.
- Everyone has the opportunity to undertake satisfying work in a diverse economy. The value of unpaid work is recognised, whilst payments for work are deemed fair.
- Peoples’ health is protected by creating a safe and clean environment where health services emphasise prevention of illness as well as proper care for the sick and elderly.
- Access to facilities, services, goods and other people is not achieved at the expense of the environment or limited to those with cars.
- People can live in an environment without fear of personal violence from crime or from persecution and/or discrimination because of their personal beliefs, race, gender or sexuality.
- Everyone has access to the skills, knowledge and information needed to enable them to play a full part in society.
- All sections of the community are empowered to participate in decision making.
- Opportunities for culture, leisure, sport and recreation are readily available to all.
- Places, spaces and objects combine meaning and beauty with utility. Developments are ‘human’ in scale and form. Diversity and local distinctiveness are valued and protected.

14.3. The Neighbourhood Plan seeks to meet or aspire to as many of these themes as possible which are within the remit of the parish to affect, amend or instigate through its policies.

15. The Natural Environment

15.1. The Neighbourhood Plan will encourage sympathetic management of the countryside and natural outdoor environment in and around the parish to enhance the quality of the landscape, improve local biodiversity and provide other benefits to the community’s quality of life.

15.2. The Plan will expect developments to retain features of high nature conservation or landscape value, including mature trees, species-rich hedgerows, natural habitats, ponds and existing areas of woodland.

15.3. New areas of recreational green space will be designed into developments to encourage biodiversity.

16. Equality

16.1. In accordance with the themes of sustainability, one of the aims of the Neighbourhood Plan is to ensure that all residents of Loxwood can live, work and play in a community without any prejudice in terms of race, gender, sexual orientation, age, disability, ethnic origin or religion.

16.2. To achieve and maintain this objective, the Neighbourhood Plan will support the examination of all new developments, planning applications and policies to ensure that there is no adverse impact on equality for the residents of Loxwood Parish.

17. Affordable Housing

17.1. Loxwood Parish has 25 families currently on the Loxwood housing register (as at October 2013) with a local connection to the village and has over 55 houses for rent as affordable housing, all owned by housing associations.

17.2. In the past affordable housing built as part of an open market development has not been
prioritised for families with a local connection to the parish.

17.3. Building of low cost housing is at an all-time low and the cost of open market housing in Loxwood is high compared to the national average. This makes it very difficult for young families with a local connection to live within the parish.

17.4. The CDC SHMA recommends that 70-75% of affordable housing be provided for rent and the remainder as Intermediate housing (part rent/part buy).

17.5. The Potential for development on “Exception sites” of affordable rented housing held in perpetuity for families with a local connection built under Chichester District Saved Local Plan policy H9 is low because of the lack of availability of suitable sites.

17.6. The last 3 developments built in the parish where affordable housing is integrated into the whole development has shown that mixing up rented and open market housing helps promote social cohesion and neighbourliness.

17.7. The CDC Housing Allocation Scheme appendix B has a Local Lettings Policy for new developments in smaller settlements. The lettings policy seeks to ensure that people with a local connection to the parish have the opportunity to stay in the parish or to return to a parish with which they have a strong connection. An objective of the Neighbourhood Plan is to meet the housing needs of local people with a connection to the settlement. Loxwood Parish Council will therefore seek to apply the CDC Local Lettings Policy for all new affordable housing designated as 100% rental.

18. Policies

18.1. Housing Allocation policy

18.1.1. The emerging Chichester District Local Plan makes provision for 6973 houses over the plan period 2012 to 2029 with the parishes north of the Plan Area of Loxwood, Wisborough Green, Plaistow and Ifold, Kirdford and Lymchmere, being allocated a total provision of 339 houses. It is proposed that 200 are found from allocated sites with 92 from small site windfall allowance. Paragraph 7.13 of the emerging District Local Plan defines windfall as small developments of less than 6 houses arising mainly through change of use, conversions and small infill sites. From the windfall allocation, 21 houses are accounted for by existing planning permissions and identified housing sites, with the remainder of the windfall allocation unidentified.

18.1.2. The allocated site requirement for the parish of Loxwood is 60 houses over the plan period. Loxwood is a semi-rural parish and the Settlement Boundary as defined by the Chichester District Council Saved Local Plan is full. New sites are required and the Settlement Boundary will need to be expanded.

18.1.2. Over the last 15 years approximately 60 new houses have been built, primarily on three specific sites:

  * Willetts Way
  * Hall Hurst Close
  * Loxwood Farm Place

18.1.3. It is recognised that the parish, in order to remain vibrant and to meet local needs for housing, employment and community facilities, should support limited growth, provided that the growth is sustainable in accordance with the NPPF paragraphs 7 to 10 and the parish retains its semi-rural character with good facilities.

Policy 1

*The Loxwood parish Neighbourhood Plan will allocate a minimum of 60 houses on allocated and windfall sites located within the Settlement Boundary defined in accordance with policy two of this Plan.*

*(Policy three will define the location of the sites.)*

18.2. Settlement Boundary policy

18.2.1. The Settlement Boundary of the village of Loxwood defines the permitted development area of the village. This term replaced the Settlement Policy Area (SPA) of the village as defined by the Chichester District Saved Local Plan.

18.2.2. There is a presumption in favour of sustainable development throughout the Plan Area in accordance with the NPPF. It is the intention to concentrate development within the Settlement Boundary in the context of a presumption in favour of sustainable development. This does not preclude sustainable development in the rural areas outside the Settlement Boundary in accordance with this Neighbourhood Plan, the Chichester District Saved and Emerging Local Plan and the NPPF.
The rural Area policy in this Neighbourhood Plan is Policy 12.

18.2.3. The Settlement Boundary of the parish as defined in the CDC Saved Local Plan has been expanded to reflect the new developments which have been built since the Boundary was last drawn. This also includes the new allocated sites under this Neighbourhood Plan of Farm Close and the Nursery, and makes provision for windfall development adjacent to North Hall. The re-drawn Settlement Boundary also limits the potential for back garden developments.

18.2.4. Development within the Settlement Boundary but not on allocated sites is deemed as “windfall housing” and should be of fewer than 6 dwellings.

Policy 2

Within the Neighbourhood Plan Area, there is a presumption in favour of sustainable development as defined in this Neighbourhood Plan, the Chichester District Saved and Emerging Local Plan and the National Planning Policy Framework. The Settlement Boundary of Loxwood village is defined in figure 6 below.

Any land within the parish of Loxwood which is outside the Settlement Boundary of Loxwood village is deemed to be rural and development should comply with policy 12 of this neighbourhood plan.

18.3. Site Assessments and Allocation of Sites policy

18.3.1. As part of the development of the Neighbourhood Plan, all the potential housing sites located in and around the village of Loxwood have been assessed in accordance with criteria provided by an independent company of planning consultants, URS. The criteria are listed in the evidence base together with details of the sites assessed.

18.3.2. Sites located adjacent to the hamlets of Roundstreet Common and Alfold Bars were not assessed as they are deemed to be in the rural area and not sustainable in accordance with the NPPF and the CDC Local Plan.

18.3.3. The individual sites which were assessed are based upon local knowledge and the Chichester District Council 2013 Strategic Housing Land Availability Assessment (SHLAA) and were deemed to be capable of accommodating 6 or more houses.

18.3.4. In the first instance, each site was assessed against four basic criteria to determine the site potential for development. These were:
   a. Is the centre of the site further than 500m (approximately 10-15 minutes’ walk) from the village centre?
   b. Is there a national environmental designation on the site or a significant part of the site? E.g. Site of Special Scientific Interest (SSI) or Area of Outstanding Natural Beauty (AONB)?
   c. Is the site within the Environment Agency definition of a flood risk zone 3a or 3b?
   d. Is the landowner or developer of the site willing for it to be developed for housing or other uses over the Plan period?

If the answer to any of criteria (a) to (c) was yes or criteria (d) no, the site was discounted.

18.3.5. A detailed assessment of the suitability of the remaining sites was carried out in accordance with the criteria provided by URS. The red/amber/green traffic light system defined by URS for each criterion was translated into scores assigning a score of three for red, two for amber and one for green. These scores were then allocated for each of the criteria. Using this methodology, three sites emerge as having potential for development, and in order of their scores are:

1. Land at Farm Close - SHLAA No. LX0860
2. Nursery Site – SHLAA No. LX0855
3. Land South of Loxwood Farm Place – SHLAA No. LX 0857

As part of the Community Led Plan, a comprehensive parish survey was carried out in September 2012. The survey was sent to every household in the Parish and a 43% responses rate was achieved. The survey report forms part of the Neighbourhood Plan evidence base Question 3.3 of the survey asked about preferences for the development of five sites located within the parish. The response to the question was as follows:

<table>
<thead>
<tr>
<th>Site</th>
<th>Sum of 2 most preferred responses</th>
</tr>
</thead>
<tbody>
<tr>
<td>Farm Close – south of the doctor’s surgery</td>
<td>121</td>
</tr>
<tr>

<td>108</td>
</tr>
<tr>
<td>Land adjacent to North Hall</td>
<td>96</td>
</tr>
<tr>
<td>Land immediately south of Loxwood Farm Place</td>
<td>65</td>
</tr>
<tr>
<td>Land adjacent to Willetts Way</td>
<td>61</td>
</tr>
</tbody>
</table>
Figure 6
Proposed Loxwood Settlement Boundary
Policy 3

The provision of allocated sites for the parish of Loxwood over the Plan period will be in accordance with policies 4 and 5 of the Neighbourhood Plan.

All developments on allocated and windfall sites should conform to the following policies as detailed below.

Policy 7 - Street Lighting
Policy 8 - Infrastructure Foul Water
Policy 9 - Built Environment - Housing Density
Policy 10 - Built Environment - Vernacular
Policy 15 - Telecommunications and Connectivity
Policy 16 - Traffic Calming
Policy 17 - Environmental Characteristics
Policy 18 - Flood Risk

Planning applications for allocated site development must contain evidence of compliance with the above policies and contain plans for any changes to existing and/or new infrastructure required by the said policies.

18.4. Land at Farm Close SHLAA No. LX0860

18.4.1. This site has been the subject of a prior planning application which sought to build 8 affordable houses as an “Exception site”. The application was refused by Chichester District Council and upheld at appeal.

18.4.2. The parish, recognising the need for both more affordable housing and low cost open market housing, negotiated a scheme with the developer which would provide 17 houses consisting of 8 affordable and 9 open market houses. Following discussion with the CDC Rural Enabling Officer, it was decided that the affordable element would include 2 one-bedroom/2 person bungalows for the elderly.

18.4.3. Considerable community benefit has also been agreed with the developer with over 60% of the site being donated to the parish as a Community Parkland within a S106 agreement. In order to encourage bio-diversity the parkland will be planted with trees, shrubs and wildflowers. The cost of the ongoing maintenance of the parkland will be funded by the developer as part of the S106 agreement. Additional car parking will also be provided for the doctor’s surgery. The developer has also committed to provide a contribution towards local traffic calming measures within the village. The proposed development includes a central community green around which the houses are distributed.

The suggested layout is shown in appendix 2

18.4.4. Question 3.4 of the Community Led Plan survey directly asked the parish residents if they would support the above proposal provided if it delivered the community benefit.

The response to the question was as follows:

<table>
<thead>
<tr>
<th></th>
<th>Yes</th>
<th>No</th>
<th>Not sure</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
<td>135 (52.12%)</td>
<td>76 (29.34%)</td>
<td>48 (18.53%)</td>
</tr>
</tbody>
</table>

During the consultation phase of the draft Neighbourhood Plan, residents who attended the consultation open days were asked to complete a questionnaire about the use of the land donated to the parish which would be used as the Community Parkland in the proposed development. In addition, the questionnaire was e-mailed to contact groups in the parish. Details of the background information provided with the questionnaire together with an analysis of the responses can be found in the Neighbourhood Plan evidence base provided on the Parish web site www.loxwoodpc.co.uk. In total, 114 responses were received to the questionnaire with 94% of respondents supporting the proposed use of the land designated as Community Parkland.

18.4.5. Based on this support for the proposal, the site will be allocated in the Plan contributing a minimum of 17 houses towards the 60 house target allocation from the Chichester District Emerging Local Plan.

Policy 4

Land at Farm Close SHLAA No. LX0860 as shown in Appendix 1 – see proposed plan layout in Appendix 2.

This land is allocated for a mixed development of affordable and market houses with community facilities as follows:

a. A residential development with a minimum of seventeen houses consisting of affordable and open market houses is recommended taking into consideration desirable densities in accordance with policy 9 of the Plan. The proportion and tenure mix of affordable housing to be in line with
current Chichester District Council requirements and allocations policies.

b. Community benefits to be considered for inclusion:
   - Land to the south and east of the housing development area for use as a Community Parkland.
   - 8 additional car parking spaces for the doctor’s surgery.
   - Central community green.
   - Contribution towards village traffic calming.

The community benefits to be subject to meeting the tests in paragraph 204 in the NPPF and subject to viability and deliverability in accordance with paragraph 173 in the NPPF.

18.5. Nursery Site SHLAA No. LX0855

18.5.1. This site is 4.4 hectares and in the past has been used as a conifer nursery. The site contains a poly tunnel, which has been used for the small-scale cultivation of vegetables for sale locally. The front of the site, adjacent to the B2133, is overgrown with conifer trees. The rear of the site also contains a detached residential property.

18.5.2. Question 3.6 of the Community Led Plan Survey asked about preferences for the use of the site.

The response to the question was as follows:

<table>
<thead>
<tr>

<td>17%</td>
</tr>
</tbody>
</table>

18.5.3. The current school is already overcrowded and the core structure of the school is out of date. In order to investigate the feasibility of moving the school to the Nursery site, the parish held detailed discussions with the school governors and West Sussex County Council (WSCC) Education Department. WSCC estimated that a new A 7 class school suitable for 210 pupils would cost in the region of £5 to 5.5 million plus the cost of the site. This would require a development well in excess of the 60 houses allocated in the Neighbourhood Plan for the project to be viable and as such is considered inappropriate for a village the size of Loxwood. The existing school site is worth approximately £1.5 million, which would leave a shortfall of £4 million plus site purchase costs.

18.5.4. WSCC were unable to provide any financial support for either the building of a new school on the existing site or for the re-location of the school to the Nursery site. Consequently no proposals for relocating the school to the Nursery Site have been included.

18.5.5. Recognising that the site is suitable for development as identified in the Chichester District SHLAA, the parish will seek to permit some development of the site in the medium term (up to 5 years).

18.5.6. Taking into account the results of the parish survey as detailed in paragraph 18.3.6 and the allocated site requirements of the Chichester District Emerging Local Plan together with maximising any potential community benefit, the Neighbourhood Plan will allocate a minimum of 43 houses in the plan period on the site. The social demographics of the parish as detailed in paragraph 13 emphasise the need to provide housing for the young and elderly and thus the affordable element of the housing should reflect that need, commensurate with the proven need at the time the site is developed.

18.5.7. The proportion and tenure mix of affordable housing to be in line with current and future Chichester District Council requirements and allocations policies. The current CDC Strategic Housing Market Assessment (SHMA) recommends that the affordable element consist of 70% rent and 30% intermediate (part rent/part buy) and this should be reflected in the affordable element of the housing.

18.5.8. The concept of a village green and the viability of some retail development and small business premises with additional car parking should be investigated, subject to a feasibility and perceived need study. Development of the site will also be expected to contribute significantly to the traffic calming requirements of Policy 16 of this Plan.

18.5.9. It is expected that the developer will consult extensively with Loxwood Parish Council in establishing an acceptable development, which is located in the centre of the village.
Policy 5

Land at Nursery Site SHLAA No. LX0855 as shown in Appendix 1

A proportion of this area of land equivalent to approximately 2.1 hectares is allocated for a mixed development of affordable and market housing and community facilities as follows:

a. Mixed Residential development of market and affordable housing. An indicative number of a minimum of forty three dwellings is recommended located towards the front of the site, taking into consideration densities in accordance with policy 9 of the Neighbourhood Plan. The proportion and tenure mix of affordable housing to be in line with the applicable Chichester District Council requirements and allocations policies. Space should be reserved for a small retail development and small business premises should they prove viable.

b. Community Benefits to be considered for inclusion comprising:-
   - A small retail development
   - Car parking for shoppers
   - Village green
   - Small Business premises
   - Designs to incorporate village traffic calming

The community benefits to be subject to meeting the tests in paragraph 204 in the NPPF and subject to viability and deliverability in accordance with paragraph 173 in the NPPF.

The above community benefits are subject to a viability study to ensure acceptable take up of retail and small business premises. If proven to be viable, Loxwood Parish Council would support the inclusion of a small number of shops and business units - the type, size and scope to be established by consultation with Loxwood Parish Council, Chichester District Council and the developers.

The remaining land to rear of the site of approximately 2.3 hectares is excluded from development as shown by the Settlement Boundary defined in Policy 2 of the Neighbourhood Plan.

18.6. Local Green Spaces

18.6.1. The NPPF paragraphs 76, 77 and 78 identifies that local communities through local and neighbourhood plans should be able to identify special protection of green areas of particular importance. By designating a piece of land as a green space, development on the land is not permitted except in very special circumstances.

18.6.2. The parish has a number of green spaces which the community values very highly and which enrich the lives of those that make use of the green space.

18.6.3. The green spaces which this Plan will seek to protect are as depicted on the maps in figure 7 and are as follows:

a. Land at North Hall.
   This land has been held in trust for the use by the parish since 1937 and is administered by the North Hall Management Committee. It encompasses the land to the front and back of the Hall and the land to the North of the Hall. The land is used every year for the village fete and contained within it is a children’s playground and a recently completed wildlife conservation area and community orchard. In the near future the children’s playground will be extended to include a Zip Wire and a Trim Trail.

b. Jubilee Gardens
   This is a small garden adjacent to Station Road opposite Nicholsfield. It is owned by the parish and administered by the Loxwood Community Gardens Initiative. It features a garden of plants and shrubs, community apple trees, salad crops and herbs, a totem pole and five trees with TPO’s. The garden has a number of staggered parallel bars of varying heights on which residents can exercise upon. There are two wooden seats which locals can use to enjoy the tranquillity of the space in the heart of the village.

c. Loxwood Sports Association Playing Fields
   This area encompasses two distinct fields separated by a mature hedgerow. The field to the North is owned by the parish and is used as the parish cricket and stool ball pitches. The field to the South is owned by the LSA and is used as the parish football pitch and has spectator stands, flood lights and players dugouts. The Sports Association Clubhouse building located on the northern field is a two storey building providing a bar, squash court, snooker room, changing rooms and a privately run physiotherapy practice.

d. Land South of Farm Close - Community Parkland
   This land is discussed in some detail in paragraph 18.4. The land will be designated as Community Parkland and will be donated to the parish as part of the development on land South of Farm Close. The parkland will be designed to provide bio
diversity to the development and will provide an essential recreational space at the southern end of the village of Loxwood. The developer, by means of a S106 agreement, is funding the ongoing maintenance of the Parkland over 35 years. It is intended to designate this Community Parkland as a Local Green Space commensurate with this policy once completed.

18.6.4. Figure 7 below shows the Local Green Spaces and their relationship to the village and parish. The Loxwood Sports Association lies to the south of the village boundary as indicated in the figure.

Policy 6

In accordance with the NPPF paragraphs 76, 77 and 78, this Neighbourhood Plan designates the Land at North Hall, the Jubilee Gardens and the Loxwood Sports Association playing fields as Local Green Spaces. The specific designation of the land is shown in figure 7.

18.7. Street Lighting policy

18.7.1. Loxwood is a semi-rural parish with street lighting provided in only 5 out of 14 locations, all of which have been developed over the last 25 years. However, no consistent policy has been applied as Hall Hurst Close was built only 3 years ago and does not have any street lighting.

18.7.2. The Community Led Plan survey, conducted in September, asked the parish for its opinion of street lighting. The response was as follows:

<table>
<thead>
<tr>
<th>Description of Lighting</th>
<th>Response</th>
</tr>
</thead>
<tbody>
<tr>
<td>None</td>
<td>70%</td>
</tr>
<tr>
<td>Low</td>
<td>22%</td>
</tr>
<tr>
<td>Full</td>
<td>8%</td>
</tr>
</tbody>
</table>

18.7.3. As can be seen, 159 respondents (63%) thought the current lighting sufficient or not needed whilst 80 respondents (32%) thought that more was needed or needed improving.

18.7.4. The location of street lighting within the parish is given in the table below.

<table>
<thead>
<tr>

</tbody>
</table>

A more recent poll of the Loxwood Society Focus Group and the Neighbourhood Plan contact list requested opinion on street lighting for new developments within the village. The poll asked:

What kind of street lighting should new developments in Loxwood have?

18.7.5. Most of the street lighting in the parish was provided when no thought was given to light pollution and energy efficiency. The NPPF paragraphs 95 and 97 support a drive to a low carbon future by reducing unnecessary energy consumption. Accordingly, this Neighbourhood Plan will require that all new developments within the Parish should not feature street lighting unless it is required to mitigate a potential road safety hazard.

Policy 7

Unless it is required to mitigate a potential road safety hazard or other requirement of the highway authority, all new roads built as part of a housing development should not feature street lighting.
LSA located South of village boundary

Figure 7
Local Green Spaces
18.8. Infrastructure - Foul Water policy

18.8.1. One of the main foul water sewers in Loxwood runs south from Alfold, along Spy Lane to the pumping station adjacent to the Onslow Arms pub. It then runs to the sewage treatment works south of Brewhurst Lane.

18.8.2. At times of high rainfall, residents in parts of Alfold and Spy Lane have experienced problems with sewage back up and leakage from inspection chamber covers into their houses and gardens.

18.8.3. Loxwood village is located in the low weald, which has high clay sub soil content. The clay expands in wet conditions and contracts in dry conditions causing relative movement to both buildings and the sewer infrastructure. Building subsidence is quite common in Loxwood, especially near trees. The net result of the high relative movement on the sewer network can be displacement of pipe joints, cracking of pipes and inspection chamber brickwork.

18.8.4. The net result of this distress to the system is that, at times of high rainfall, the water table rises allowing water to enter the sewer network, which dramatically increases the water content and flow towards the pumping station. It has been estimated that, at times of very high rainfall, the increase in water content in the network at Loxwood can be up to 100 times the “dry day” content of the network. The pumping station is not designed to cope with this volume of water and acts as a choke point causing the sewage/rainwater mixture to back up to the level of inspection chamber covers and so cause spillage into gardens etc. Ingress of tree roots into the sewer system pipe work at displaced joints or cracked pipe work can also cause choke points and system back up.

18.8.5. Policy 1 of this Neighbourhood Plan allocates 60 new houses to the parish of Loxwood and policy 3 defines the sites allocated for new development. The additional housing has the potential to exacerbate the problems of an already fragile primary sewer network and any large-scale new connection to the existing system will need to be justified by a rigorous analysis. Where there is insufficient capacity in the local network, a connection should be made at the nearest point of adequate capacity as advised by Southern Water.

Policy 8

Any new direct connection to the Loxwood primary sewer network of new developments and/or expansion to existing developments will not be supported unless it can be shown by rigorous analysis that there is sufficient capacity in the local sewerage system and that the new connection will not increase the risk of system back up/flooding.

Where capacity is insufficient in the local sewerage system, the development will need to provide improvements to the sewer infrastructure to enable a connection to the nearest point of adequate capacity as advised by Southern Water. New developments will be permitted only if the network can accommodate the additional demand for sewerage disposal either in its existing form or through planned improvements to the system, or can be provided in time to serve it in advance of the construction of the development.

18.9. Built Environment - Housing Density policy

18.9.1. Paragraph 47 of the National Planning Policy Framework states that Local Planning Authorities should set out their own approach to housing density to reflect local circumstances and this has been reflected in paragraph 17.6 of the Chichester District emerging Local Plan. The Local Plan recognizes that housing density should balance the goals of efficient use of land with the characteristics of the surrounding built up area.

18.9.2. In the past 15 years, local authorities have been driven to meet national guidelines for density, which have meant that recent open market developments in the village of Loxwood have had densities which do not match the vernacular of the village.

18.9.3. Older style open market housing generally has generous plots of between 40 and 200 m² although there are some of significantly greater size. A characteristic of any semi-rural residential development is the reasonably generous ratio of plot to building plan area. In the village of Loxwood, 30% of the houses have plots that are in excess of 10 times, 45% have plots between 10 and 5 times and 25% have less than 5 times the building area.

18.9.4. The maintenance of local character has a higher significance than achieving a minimum housing density figure. The Neighbourhood Plan
will not seek to be prescriptive with respect to housing density but place emphasis on good design and layout which fits the vernacular of the village and the development’s setting within the village and in relation to adjacent buildings.

**Policy 9**

*The density of any new development should be in character with the local surrounding area, respect the semi-rural nature of the parish and be designed to give an impression of spaciousness with uniform houses and plots being avoided.*

**18.10. Built Environment – Vernacular policy**

The vernacular of the parish is defined in the Village Design Statement (VDS) which was written in 2003. The opportunity has been taken to incorporate the VDS recommendations into this Neighbourhood Plan. The VDS forms part of the reference evidence base for this document.

18.10.1. The parish building style has developed over the last 400 years using materials from local brickworks utilizing the abundant weald clay.

18.10.2. Walls are generally of clay brick in shades of red and brown, while the upper sections are frequently covered with clay tiles in similar colours. Light colours are rare. Some walls are painted white or cream and some are clad in painted wooden boards.

18.10.3. Roofs are mostly of red and brown clay tiles while weathered concrete tiles are not uncommon. Older buildings exhibit Horsham stone tiles and there is some use of slate, particularly in the centre of Loxwood. The roofs tend to be plain with occasional use of gable windows.

18.10.4. There are very few large dormer windows but, in general, they do not fit the local style. Ridges are straight or have the regional characteristic hip at each end of the roofline.

18.10.5. Most houses are two storeys with roof angles typically 45 degrees. One recent exception to this building style is Willetts Way, which features many three-story houses with high rooflines incorporating acute angles on small plots that are not in keeping with the existing houses.

18.10.6. In the main, screening for housing plots is provided by hedging, but also some post and rail fencing. Boarded fences to the front of houses tend to give a hard line and are not common. In the newer developments, open plan is common but, in most cases, the open space has been planted with some trees and bushes.

18.10.7. The Neighbourhood Plan will seek to ensure that any new houses built in the parish of Loxwood reflect the general theme expressed in building styles and materials used over many years.

18.10.8. The parish has many listed buildings and houses of historic interest as defined in appendix 3. These buildings will be protected to ensure that any development respects and preserves their setting, form and character so that any special architectural or historic interest is maintained.

**Policy 10**

*The Built Environment – Vernacular Policy will apply to all new developments of one or more houses.*

All new developments should continue to reflect the character and historic context of existing developments within the parish.

a. Materials in any new development should be of clay-based products in red or brown hues with limited use of white paint on brick or wood that could be used to provide interest. Light hues should be avoided.

b. Where brick elevations are used, half clay tile hanging will help break up the visual effect of the elevation and maintain the continuity of design throughout the village.

c. Where possible house height should be restricted to 2 storeys.

d. Apparent excessive bulk of houses should be avoided by careful design of roof elevations, particularly on rising ground. In general, clay or concrete roof tiles should be used.

e. Flat roof dormer windows should be avoided.

f. Where enclosure of plots is planned, hedges of indigenous plants or post and rail fences are preferable giving a sense of open space from plot to plot.

g. Developments should be enhanced by landscaping and planting with existing trees and hedges preserved whenever possible.

h. The provisions on the built environment contained in the Village Design Statement and in the
Chichester District emerging Local Plan policies 33 and 47 will be required.

i. Any new development adjacent to a listed building or building of historic interest and/or open space as defined in appendix 3 should be sensitively designed to conserve and enhance the setting, form and character of the building and/or space.

j. The design of developments should recognise the distinctive local character of the parish and sensitively contribute to creating dwellings of a high architectural and rural quality

k. All new buildings and/or developments should be designed with the security of the building and its occupants at the forefront in terms of personal safety, crime prevention and environmental efficiency.

l. Any development resulting in the loss of ancient woodlands including the loss of aged/veteran trees outside the ancient woodland will not be permitted.

18.11. Wey and Arun Canal policy

18.11.1. In the short term the reconstruction of Gennets Bridge Lock to the north of the parish will be followed by other northerly extensions of the canal across the parish and county border into Surrey. The Wey & Arun Canal Trust is also working in the Shalford and Bramley area where the canal meets the Wey Navigation and at summit level by Dunsfold Park.

18.11.2. In the medium term, as the canal extends north, it is likely that more boats will be encouraged onto the canal. The Trust is anxious to avoid long lines of boats lining the towpath and will be looking for moorings to be accommodated away from but connected to the canal through landowner involvement and in cooperation with the Trust. This could give opportunities for servicing and maintenance of boats in the future.

18.11.3. At present the Onslow Arms pub provides catering services for boat charters at Loxwood but, with a more extensive navigable waterway and more boats, other options may arise elsewhere to provide similar services.

18.11.4. The Trust’s intentions are to protect the green corridor of the canal as a linear park which would harmonise with views of the village. This will not preclude sensitive waterside developments if they enhance the facilities of the canal and Loxwood Parish.

18.11.5. The continuing expansion of the canal will be supported to ensure business, leisure and tourism opportunities for the parish are identified and to maintain the waterway as a linear park for the benefit of both visitors and residents of the parish.

Policy 11
The Wey and Arun Canal Trust long-term vision of a through navigable route from the Wey to the Arun Rivers will be supported.

This policy will:-

a. Protect the green corridor and avoid boats lining the edge of the canal, support will be given for canal moorings located away from but connected to the canal. Tree and hedgerow planting should be used to soften the visual impact of the moorings.

b. Support the expansion of the Wey and Arun Canal Trust tourism activities where it can be demonstrated that such expansion benefits the parish by means of increased tourism, business and leisure activity.

c. Maintain and protect the heritage assets adjacent to the canal

18.12. The Rural Area policy

18.12.1. The rural area is defined as anywhere outside the Settlement Boundary as depicted by figure 4. The rural area makes up the majority of the land area of the parish and includes the hamlets of Alfold Bars and Roundstreet common.

18.12.2. The area is scattered with beef, dairy and arable farms with Scandia Hus, Indigo Cabinet Design, the Tichbourne and Onslow Arms Pubs being the only non-farming businesses activities employing more than 2/3 people.

18.12.3. Any development will be limited primarily to that which requires a rural location, is sensitive to its setting by means of size, bulk and location and supports rural diversification and sustainability of the rural area. The NPPF paragraph 55, the CDC Emerging Local Plan and the General Permitted Development Order address development in the rural area and these policies should be followed except to provide business and agricultural...
opportunities as described in paragraph 18.12.4 below.

18.12.4. As illustrated in paragraph 12 of this Plan, the parish does not provide much in the way of employment opportunity. It is recognised that in order for the rural community to thrive and to help provide employment, it is necessary to support existing agriculture, small business and start-ups and to recognise the need for existing business to expand and thus provide much needed local employment. In addition, it is desirable for agricultural workers to have the ability to live as close as possible to their place of work.

Policy 12

Development within the rural area will be in accordance with the NPPF paragraph 55, the CDC Emerging Local Plan and the General Permitted Development Order. The re-use of farm and rural buildings outside the Settlement Boundary for agricultural/business purposes or to provide dwellings for agricultural workers will be supported subject to the following criteria:

a. The proposed re-use would not have significant harmful impacts on the surrounding rural landscape and is sensitive to its setting by means of size, bulk and location.

b) The proposed re-use would not have any unacceptable impact on the local road network.

c) The proposed re-use would not cause any unacceptable conflict with agriculture and other land-based activities.

d) The proposals would not have any significant harmful impact on the amenities of neighbouring residents and other users.

e) The buildings concerned would not require substantial rebuilding or extension.

New agricultural or business development on land already in agricultural or commercial use outside the Settlement Boundary will be supported subject to the following criteria:

i. The scale and nature of any proposal would enhance the overall site setting and its design will be such as to minimize the overall impact of the proposed development on the surrounding rural landscape and be sensitive to its setting by means of size, bulk and location.

ii. The proposals would not have an unacceptable impact on the local road network

iii. The proposals would not cause unacceptable conflicts with agriculture and other land-based activities

iv. The proposals would not have any significant harmful impact on the amenities of neighbouring residents and other users.

18.13. Housing Extensions-Style and Vernacular policy

18.13.1. The Neighbourhood Plan will seek to ensure that extensions or modifications to existing premises to increase their accommodation, provide extra facilities in out buildings, or add extra luxury to their living space, will continue to reflect the building styles and materials that have continued over many years. It will ensure that additions to premises will reflect the style and vernacular of the original building and temper the proportional increase in bulk of the building.

18.13.2. The opportunity has been taken to incorporate the Village Design Statement recommendations into this policy.

Policy 13

All house extensions requiring planning permission should follow the style and vernacular of the original building paying particular attention to details e.g. size and shape of windows, roof shapes and pitch angles, tiling materials, brickwork colour and texture etc.

In assessing the suitability of dwelling extensions, the following are typical criteria that will be applied (this is not an exhaustive list and other criteria may be applied dependent on the style of the existing property):

a) Where possible the same type of materials should be used but where uPVC is to be used it should respect as far as practicable the original design.

b) The combined building of the original and the extension should not significantly change the form, bulk and general design of the original building or harm its landscape character or setting.

c) The permitted increase in ground footprint of the extension should not be more than that prescribed in CDC Design Guidelines for Alterations to Dwellings & Extensions.
d) Any proposed extension adjacent to a listed building or building of historic interest and/or open space as defined in Appendix 3 should be sensitively designed to conserve the setting, form and character of the building and/or space.

18.14.1. The strength of the local economy and of the community goes hand in hand and should be addressed together. Supporting the growth of a stronger local economy is a central theme of the Neighbourhood Plan.

18.14.2. Because Loxwood is a semi-rural parish and thus relatively remote from major centres of business and economy, there is an inherent need for self-reliance. However, the demographic data shows that economically active people in the age range 20 to 35 find it harder and harder to remain in the village for a variety of reasons generally relating to the availability of affordable housing and the ability to obtain local employment.

18.14.3. There are an increasing number of residents who are home workers choosing or needing to work from home due to the high cost and/or unavailability of public transport and the lack of jobs in the locality. For the majority of other workers, their only option is to work away from the area commuting increasingly greater distances to secure economic employment.

18.14.4. The key to this is clear broad support for a stronger local economy which will provide greater positivity, flexibility and responsiveness thus encouraging new business start-ups or expansion of those few local businesses within the parish. Consequently, their needs should be accommodated wherever possible and practicable and they should be encouraged to remain within the community and to grow. The Parish also needs to attract new enterprises to boost and diversify the local economy.

18.14.5. There is a need to recognise that many people conduct their businesses from home and that this will increase as economic pressures on travel and jobs increases. The Neighbourhood Plan needs to reflect this in its proposals to provide more affordable housing and to encourage the provision of local business premises together with some retail facilities possibly with accommodation above. Loxwood parish is a unique place where businesses sympathetic to a rural community can and should grow and flourish.

18.14.6. Economic development proposals should only be seen as unacceptable if they would have significant harmful impacts on other matters agreed to be locally important such as the needs of the community, the needs of visitors, preservation of historic/heritage assets and local environment.

Policy 14

New retail/business start-ups or the expansion of existing businesses will be supported, provided they can be shown to be viable, sustainable and benefit the local economy and the wellbeing of the parish. They should be sensitive to the local setting and not have a detrimental impact on the surrounding environment.

The provision of viable small business premises or retail properties within new developments will also be supported where economically sustainable and in accordance with this policy.

Such development should:

a. Give broad, positive support for the development and growth of the local economy though flexible and responsive planning and encourage local economic innovation.

b. Meet the needs of existing and future local businesses, including quality workspace, car parking and storage.

18.15. Telecommunications and Connectivity

18.15.1. The provision of good telecommunications is increasingly important in the modern world. It is even more important in rural areas where physical transportation services are limited.

18.15.2. There has been a marked failure to provide good connectivity in rural areas resulting in a number of government backed initiatives to remedy this situation. The ability of these initiatives to deliver good connectivity to all existing and new developments is, as yet, unknown.

18.15.3. The world of telecommunications and connectivity is a changing environment with new technological advances occurring all the time. However, it is considered that the provision of fibre optic connections is the most robust and future-proof method of delivering connectivity and this should be the aim for all developments. Other technologies may provide interim solutions.
18.15.4. All developers should consider the connectivity requirements of their proposals at an early stage. This may require adjustment to plan designs or investment decisions to ensure that the desired connectivity can be achieved in such a way as to contribute to and enhance the wider network for Loxwood Parish.

18.15.5. This policy is also intended to ensure that where major projects (such as roads, utilities etc.) are undertaken that can contribute to the provision of ducting for communication purposes, these opportunities are taken and offered to local groups first.

Policy 15

New developments should demonstrate how they will contribute to and be compatible with existing local fibre or internet connectivity. This could be through a ‘Connectivity Statement’ provided with relevant planning applications. Such statements could consider such aspects as:-

a. The intended land use and the anticipated connectivity requirements of the development.

b. Existing or proposed data networks and their anticipated speed (fixed copper, 3G, 4G, fibre etc.).

c. Realistic assessments of connection potential or contribution to any such networks.

This policy aims to see that new developments have the capability to connect to the internet with the best available speed and with realistic future proof upgrade capability. Subject to NPPF 173, suitable ducting that can accept fibre should be provided either to:-

- the nearest access point to existing internet providers; or
- a local access network; or
- another location that can be justified through the connectivity statement.

Major infrastructure development should provide ducting that is available for community owned local access network or fibre optic cable deployment.

18.16. Traffic Calming and Speed through the Parish

18.16.1. The Community Led Plan Survey conducted in September 2013 determined that the number one concern for Loxwood residents was road and pedestrian safety. The village has developed either side of the B2133, which runs north to south. However, the majority of homes and the Primary School are located on the east of the main road and the Post Office/shop is situated on the west side.

18.16.2. The main hazards are perceived to be the speed of traffic through the village endangering people wishing to walk or cycle on the B2133 to/from the post office, village shop, North Hall and the Onslow Pub and from the Post Office down Station Road past Nicholsfield and the School.

18.16.3. The only footpath, which runs continuously between North Hall at the northern end of the village and the Onslow Pub at the southern end, is located on the east side of the B2133, necessitating crossing the road to access the shops and North Hall.

18.16.4. Furthermore, in many locations this path is very narrow (less than one metre) making it hazardous when walking both for the elderly and for parents with young children in prams/buggies, as these can be in excess of one metre wide.

18.16.5. There is inadequate car parking for shoppers using the post office, village shop, butchers or hairdressers. Pedestrians have to cross the B2133 when visiting the shop. There is no off road shoppers car park, so people park randomly where they can - blocking the bus stop; on double yellow lines; across the access to the bridleway adjacent to the Post Office. This, combined with lorries and vans loading and unloading, makes the area around the junction of Station Road and the shops very congested and potentially dangerous.

18.16.6. A recent independent speed investigation by URS at a location between North Hall and the Post Office established that 84% of traffic on the B2133 exceeded the 30 mph speed limit with the 85% percentile speed being 41.8 mph. This means that 15% of traffic is exceeding 42 mph through the village.

18.16.7. Accordingly, in order to mitigate the potential road safety risks on the B2133 in the village of Loxwood, the Neighbourhood Plan will seek to introduce traffic calming measures along the B2133 for all allocated site developments such as the Farm Close site and Nursery site. This will be included as a contingent part of all new development proposals including windfall developments of greater than one dwelling.

18.16.8. Traffic consultants, URS, were commissioned to carry out a traffic calming study to examine potential traffic calming measures and locations. This focuses on traffic speed reduction, safe
crossing points, pedestrian safety/footpaths and potential cycle tracks throughout the village road system to the village boundaries. The URS report can be found in the evidence base.

18.16.9. Developer contributions derived from allocated site developments at Farm Close, and the Nursery site together with designated contributions from all private developments within the parish and specifically negotiated developer contributions on any open market housing will be used to help fund traffic calming work. It is understood that any such work will need the agreement of West Sussex County Council.

Policy 16

Traffic calming along the B2133 and Station Road in the parish of Loxwood will be progressively introduced during the Plan period by means of developer contributions on any open market development greater than one house in size.

The objective of the traffic calming measures will be to introduce a safer environment for pedestrians and road users by establishing the following:

a) A decrease in the average speed of traffic on the B2133 in the village of Loxwood.

b) Provide safe crossing points at the Nicholsfield/Station Road junction and on the B2133 at the Post Office/Stores, North Hall, and St John the Baptist Church.

c) Facilitate safer and more efficient parking for those shoppers using the shops along the B2133

d) Negotiate with developers funding for the introduction of traffic calming measures as part of the design of road access requirements on all allocated sites.

18.17. Environmental Characteristics

18.17.1. The natural environment that surrounds us, our cultural and historic heritage and the built environment are key in terms of attracting residents, investment, employment and tourism to the area. This Neighbourhood Plan strongly supports their protection and enhancement whilst allowing development in areas where environmental harm is negligible or is adequately mitigated.

18.17.2. New sustainable development and growth should protect, respect and enhance all aspects of the environment we live and work in making positive contributions, where possible, to ensure that the qualities we all value are not eroded.

18.17.3. This Neighbourhood plan supports the use of countryside protection policies to protect and enhance the separate identity and distinct character of settlements such as Loxwood.

18.17.4. The development of green infrastructure is encouraged to provide links for wildlife and residents as well as minimising the coalescence of settlements.

18.17.5. Good high quality design is crucial to achieving attractive and durable places in which to live. It is also an important element in achieving sustainable development and reducing our impact on climate change. This Plan encourages the use of green, energy saving technologies where practicable to ensure that high environmental standards are met and that the emission of greenhouse gases is minimised. Sustainable design is promoted through an awareness of energy conservation and efficiency, a reduction in waste, recycling of materials etc. This policy relates to all new buildings and their setting in the built and rural landscape and is complimentary to Chichester District Council’s Emerging Local Plan in respect of green policies and energy efficiency.

Policy 17

All new developments or extensions to existing developments/dwellings should conform to the latest recommended building standards/procedures. New dwellings shall meet a minimum of Level 4 (from 2013 to 2016) and Level 5 (from 2016) in the Code for Sustainable Homes.

Developers should embrace within their design new technologies from the conceptual phase through to implementation and should ensure energy conservation assessments are conducted to demonstrate compliance with this policy.

These requirements will be subject to viability and deliverability in accordance with paragraph 173 of the NPPF.

18.18. Flood Risk

18.18.1. The village of Loxwood takes its name from the River Lox which runs west to east and is located to the South of the village centre. Tributaries flow into it from
the north past the Primary School and through to the river close to the Onslow public house.

18.18.2. The adjacent low lying areas are liable to flooding during periods of high rain exacerbated by the nature of the heavy clay soil found in the low weald. This plan will seek to avoid development in areas of high flood risk.

18.18.3. Any new development will lead to increased surface water run-off and therefore all new developments are encouraged to incorporate surface water mitigation techniques into their design.

18.18.4. Figure 8 below shows the areas of flood plain associated with the river Lox and tributaries within the Loxwood village boundary.

**Policy 18**

*Development in areas of flood risk zones 2 & 3 as identified by the environment agency flood risk maps will only be permitted in accordance with the NPPF.*

*New development outside flood risk zones 2 and 3 should be subject to a site specific flood risk assessment, where relevant, in accordance with the NPPF.*

*Surface water mitigation techniques should be employed to ensure that there is no net increase in surface water run-off.*

*(See policy 8 for foul water)*

19.3. Appendix 3 Buildings, Settings and Spaces

Village Centre

*Jubilee Villas*
*Ye Olde Cottage*
*Black Hall*
*Post Office*
*1 & 2 Pond Cottage*
*The Dependant’s Combination Stores*  
(now a parade of shops)

These are all old houses near the centre of the village which, along with listed Hall House, Willetts, Church Cottage and the Granary, represent life of the village prior to the turn of the twentieth century. Their setting today, around the pond provides the village with a link to its history. Hall House was the original inn facing on to the Green Lane.

**High Street**

*Cherry Cottage*
*Cherry Villa*
*Penfold*
*Alemeda*
*Hilltop Cottage*

These old houses along with their listed neighbours form an almost unbroken line down the hill and represent some of the earliest houses in the village. The aspect is enhanced by almost no properties being on the opposite side of the road.

**Canal Properties**

*Clifton’s Workshop, High St.*
*Canal Villa, High St.*
*Arun Villas High St.*

These houses had a close association with the Wey & Arun Junction Canal from the middle of the nineteenth century. A major wharf on the canal existed around this particular area.

**Vicarage Hill**

*Old Vicarage*

A beautiful house is representing the esteem and wealth of the Church at the turn of the twentieth century.

*Flitchfold farm*

Old farmhouse, once part of Lakers Lodge Estate, which with its pond and out-buildings, gives a rare view of a collection of farm buildings close to the public road.

**The Old School**

Built in 1876 this church school continued until the school in Nicholsfield was constructed in the 1950’s when it became a private dwelling.

**Station Road**

*Little Pancake Cottage*
*Pancake Cottage*

These houses form an interesting group with listed Hillgrove at the eastern entrance to the village and they are examples of some of the original village houses of the seventeenth century.

*The Old Cottage*

One of the earliest buildings in Station Road.

**Spy Lane**

*1-4 New Houses*
*Chapel and grounds*
*The Old Cottage*

The chapel was the centre of the world of the Dependent Brethren in Loxwood for one hundred years from the mid nineteenth century. The row of cottages provided accommodation for some of their work people. The cemetery is at the back of the chapel.

**Spy Farm**

*Historic farm house - from the seventeenth century*

**Loxwood Hall complex**

*Loxwood Hall*
*The Clock House*
*Cedar House*
*The Court*
*The Lodge*
*Little Loxwood*
*Loxwood Cottage*
*The Courtyard House*
*Tokens Farm*
*The Coach House*

These buildings, formally part of Loxwood House, can trace their origins back to the 1500’s. In the early twentieth century it had connections with big business and horse racing. There was a glass factory on the site as far back as 1610.
Alfold Bars

Edwardian Houses along the B2133
These houses, together with the listed Sir Roger Tichborne Pub, comprise a little hamlet from the early twentieth century.

Brewhurst Lane

Buildings local to Brewhurst Farm & Mill
As well as the actual listed houses, the setting of the collection of building around that area is a very significant asset to the village locality.

Guildford Road

Entrance to main village
The three listed houses of Four Houses, Chestnut Mead and Elm Cottage, along with Yew Tree Cottage in Merryhills Lane, have an interesting setting which helps to set the tone of the village at its northern entrance.

Spaces and Outlooks

There are spaces and outlooks from many parts of the village which give pleasure to the residents and form the rural character of the village.

Area around North Hall including the parish land to the North of the hall including the wildlife conservation area.

Corners at entrance to Nicholsfield including the Jubilee gardens opposite Nicholsfield. Village pond at centre.

Loxwood Sports Association football and Cricket pitches.

Views to the West & North West from Flichfold over Blackdown and Hascombe Hill

Views to South, East and West from the ridge running to east of Spy Lane and Merry Hills.

Line of Canal and the open space on each side.

Local Lanes within the parish
