

Chichester Local Plan Examination statement

Matter 8: Other area specific policies/ strategies – Policies 10/14/20

September 2014

Chichester Local Plan Examination statement

Matter 8: Other area specific policies/ strategies – Policies 10/14/20

This statement has been produced as part of the examination of the Chichester Local Plan. It answers the Inspector's questions relating to matter 8.

Any queries about the report should be sent to the programme officer:

Address: Mr. C. Banks

21 Glendale Close

Horsham West Sussex RH12 4GR

- 1. Does the policy (10) set out a clear strategy for managing development in the City and at the edges of the urban area?
 - 1.1. Yes, policy 10 of the Local Plan: Key Policies Pre-Submission (CD-01) clearly sets out the strategy and principles for development at Chichester city. The policy sets out the role of the city as a sub-regional centre drawing out what makes the city different from the rest of the Plan area. It is a very place specific policy and identifies some of the individual characteristics of Chichester city that need to be taken into account in assessing proposals for development, for example, supporting the role of the city as a shopping destination, enhancing the character and distinctiveness of the city's local neighbourhoods etc.
 - 1.2. It is acknowledged that while the policy encourages development to enhance its position as a sub-regional centre it does not make reference to the city being a place to live. For clarity the proposed main modification **M61** amends the first bullet point to read "...its role as a shopping/visitor destination and a place to live"¹.
 - 1.3. Since the Local Plan was originally drafted, further consideration has been given to whether an Area Action Plan or Development Brief is the most appropriate way to manage significant change in the city. To allow for flexibility and the ability to adopt the appropriate approach depending on the circumstances that need addressing, main modification M62 has been proposed which amends the final paragraph to read, "The Council may prepare..."
 - 1.4. Policy 10 has not been drafted to include specific reference to development on the edges of the city although it does make reference to "enhancing the public realm, especially within the city centre and key routes in and out of the city" (criterion 8).
- 2. Is an Area Action Plan the most appropriate vehicle to set out a coordinated framework for implementing this policy and to link sites to the north east of the city and the Westhampnett and NE Chichester SDL?
 - 2.1. Since the Local Plan has been drafted consideration has been given to whether an Area Action Plan or Development Brief is the most appropriate way to bring about changes to the City. In particular due to a number of recent applications within the area to the north of the City (at Graylingwell,

¹ Schedule of Proposed Main Modifications to the Pre-submission Local Plan: Page 6

² Schedule of Proposed Main Modifications to the Pre-submission Local Plan: Page 6

Chichester Barracks, Chichester University and current application at Land South of Graylingwell Drive (175 dwellings) (CC/14/00733/EIA³ and CC/13/03775/OUT⁴) it is likely that the area will be developed in the near future in line with the Sites in Chichester City North Development Brief (CD-76a). If the existing planning permissions are implemented there will only be a small area of land remaining, where the existing development brief would be significant and an area action plan would not be needed.

- 2.2. For clarity main modification **M73** which relates to Policy 14 of the Local Plan: Key Policies Pre-Submission (CD-01) has been proposed which amends the policy to read, "The Council will may prepare an...access improvements associated with the Westhampnett/North East Chichester Strategic Development Location (see Policy 17)"⁵.
- 2.3. Policy 14 has not been drafted to include development outside the urban area being provided through an Area Action Plan. The links between the Westhampnett/NE Chichester SDL and the city are contained within the Planning Concept Statement for Westhampnett and Policy 17 of the Local Plan: Key Policies Pre-Submission (CD-01) which refers to development being well integrated with the neighbouring "residential areas in Chichester city and should be planned to provide good access to existing facilities".
- 2.4. It is acknowledged that a Development Brief may be a more appropriate tool to deliver a coordinated approach to development, rather than an Area Action Plan, if the current development brief needs revision.

3. At what stage is it appropriate for negotiations regarding the balance of open space/ built development to take place?

- 3.1. Detailed negotiations regarding the balance of open space/built development will take place at the planning application stage.
- 3.2. Guidelines for the provision of open space and built facilities on the Sussex Partnership NHS Trust Lands are set out in paragraphs 3.15, 3.16 and 6.12 of the Sites in Chichester City North Development Brief (CD-76a).

³ Planning Application CC/14/00733/EIA

⁴ Planning Application CC/13/03775/OUT Phase 2 of the redevelopment of the former quarry and landfill site, through the erection of one Class A1 retail warehouse building measuring a total of 7,184 sq.m two ancillary Class A3/A5 units measuring a total of 520 sq.m a petrol filling station, car parking and access arrangements and amendments to Westhampnett Road and associated landscaping works

⁵ Schedule of Proposed Main Modifications to the Pre-submission Local Plan: Page 9

4. Is the requirement for 300 homes justified by the evidence?

- 4.1. Yes, the Council recognises the role of Southbourne, in paragraph 12.61 of the Chichester Local Plan: Key Policies 2014-2029 Pre-submission (CD-01), and the importance of sustaining and enhancing this role in paragraph 12.63.
- 4.2. The allocation of 300 homes is justified by the development plan strategy set out in Policy 2 which identifies Southbourne as a settlement hub and states that "new development to meet identified needs will reinforce the role of settlement hubs as centres providing a range of homes, workplaces, social and community facilities." Further evidence is in the Settlement Capacity Profile (CD-75) which highlights the sustainability of Southbourne. In particular the presence if shops, a railway station and primary and secondary schools.
- 4.3. Options for higher levels of housing were included in the Housing Numbers and Locations consultation (CD-97) and Parish Housing Numbers consultation (CD-99a & CD-99b). The Sustainability Appraisal (CD-03) assesses options of 250-500 homes (broadly equivalent to the Local Plan) and 700+ homes. The higher option shows significant positive benefits for a range of indicators, including housing need, sustainable transport and the economy, but also has potential to create severe adverse impacts on water and waste resources, biodiversity and urban form.
- 4.4. The Strategic Housing Land Availability Assessment 2014 (SHLAA) (CD-16) identifies a total of 1,897 potential dwellings from 2014-2029 for Southbourne Parish as a whole with approximately 1,500 identified at the settlement of Southbourne. The SHLAA does recognise in paragraph 3.30 that the yields may be affected by issues not currently evident by the high level broad assessment that has been undertaken.
- 4.5. Paragraph 2.5 of A Balanced Approach to Housing Provision (CD-09) highlights the sustainability of the East/West Corridor and whilst recognising that the landscape impact of significant amounts of new development will not be as severe as other more remote parts of the plan area it acknowledges the potential harm to the South Downs National Park if the amount of development were to be increased. Similar considerations would apply to the Chichester Harbour Area of Outstanding Natural Beauty.
- 4.6. Paragraph 3.23 of A Balanced Approach to Housing Provision (CD-09) highlights further potential constraints with regard to recreational disturbance and recognises a significant increase in housing provision could prove to be

undeliverable due to the need to allocate land that is designated as feeding habitat for Brent Geese.

- 4.7. In the Appendix of A Balanced Approach to Housing Provision (CD-09) Southern Water acknowledge the potential for Thornham Wastewater Treatment Works to accommodate 1,700 new homes and the Environment Agency state that although there are no current environmental concerns there is limited scope for upgrading the works due to the sensitivity of the receiving waters.
- 4.8. As a result of the proposals in this Local Plan, Southbourne will need to assimilate a large amount of new development within the structure of the existing village. The evidence base demonstrates that the impacts can be mitigated but any significant increase in the amount of development would require a re-evaluation of the evidence to ensure that development would be deliverable and sustainable.

5. Does the policy provide sufficient clarity on the potential for a single or several extensions to Southbourne?

- 5.1. Yes, the policy does not seek to stipulate whether the strategic development at Southbourne should take the form of either one or multiple extensions to the village. This decision and the identification of the sites are left to the Neighbourhood Plan.
- 5.2. Southbourne Parish Council is undertaking a neighbourhood plan and through consultation with residents of the parish has identified the most appropriate sites whilst addressing concerns raised with regard to transport, congestion and recreational disturbance. Consultation on the Pre-submission Southbourne Neighbourhood Plan ended on 5th June 2014 with the submission likely to be towards the end of August 2014⁶.

6. Does the policy set out a clear approach to employment development, following on from paragraph 12.65?

- 6.1. Yes, the Council considers that there is a clear approach to employment development at Southbourne.
- 6.2. Paragraph 12.65 of the Local Plan: Key Policies Pre-Submission (CD-01) refers to residents of Southbourne having good access to employment areas such as Portsmouth and Chichester. The existing industrial estate at Clovelly

⁶ Southbourne Parish Council Pre-submission consultation Neighbourhood Plan

- Road is constrained with no opportunity to expand. It is also an older estate which may require upgrading in the future.
- 6.3. The section 19 of the Chichester Employment Site Viability Assessment (CD-38a) specifically made an appraisal of whether an additional 300 homes being built at Southbourne (to be identified through the Neighbourhood Plan) would lead to the requirement for additional employment provision given the existing industrial estate within the settlement and good transport links to Havant, Portsmouth and Chichester etc.
- 6.4. The appraisal concludes in paragraph 19.6 of the Chichester Employment Site Viability Assessment (CD-38a) that there are excellent commuting links with a very short commuting time to Chichester, Portsmouth and Fareham. Whilst it is acknowledged that the population of Southbourne will expand, the potential to deliver employment opportunities within the settlement is currently low. It is also acknowledged that a large proportion of the active population will require low managerial and professional and higher managerial and professional occupations. Southbourne appears to be a commuter town with professionals seeking to locate there for good quality schools, a semi-remote location away from larger urban areas, but commutable. It is concluded that, due to a lack of likely delivery by the market, Southbourne does not need to consider an employment land allocation.
- 6.5. In light of the conclusion of the Chichester Employment Site Viability Assessment (CD-38a) Policy 20 of the Local Plan: Key Policies Pre-Submission (CD-01) does not make reference to the need to provide employment land at Southbourne.

7. Is the requirement for 100 homes in East Wittering/ Bracklesham justified by the evidence?

7.1. Yes, the requirement for 100 homes in East Wittering / Bracklesham identified in Policy 24 Local Plan: Key Policies Pre-Submission (CD-01) is justified by evidence. The allocation of 100 homes is justified by the development plan strategy set out in Policy 2 which identifies East Wittering / Bracklesham as a settlement hub and states that "new development to meet identified needs will reinforce the role of settlement hubs as centres providing a range of homes, workplaces, social and community facilities." This is further evidence by the Settlement Capacity Profile (CD-75) which highlights the sustainability of East Wittering / Bracklesham. In particular the presence of shops, primary school, doctors surgery, village halls and pubs.

- 7.2. Whilst East Wittering/Bracklesham is a sustainable location for a limited amount of development, there are a number of reasons why it would not be appropriate to allocate more development to the area. The character of the settlement is currently that of a large village (Settlement Capacity Profiles (CD-75)). The character of the coast on the Manhood Peninsula is mainly undeveloped with relatively small villages (refer to paragraph 3.2.7 of Landscape Capacity Assessment Extension (CD-53a). It is a tourist destination with a relatively small amount of employment which is either seasonal or related to the tourist industry or much of the working population commute for work (section 20 of the Employment Site Viability Assessment (CD38a)).
- 7.3. The village has accommodated a significant amount of development in recent years according to the Settlement Capacity Profiles (CD-75) 350 new dwellings have been built between 2001- 2011. There are concerns over infrastructure capacity constraints relating to transport and surface water drainage (Environment Agency Risk of Flooding from Surface Water (CD-40). The Parish Council have raised concerns during the Preferred approach (CD-98) "about the difficulty in leaving the Manhood between 8 and 9 a.m. on weekdays and at weekends in the summer, the road to the beach has tailbacks often as far as Donnington almost all day and in reverse in the evenings. Until the situation is alleviated, it is surely unwise to build any more houses here or in East Wittering. The parking in East Wittering shopping centre can be difficult at times". Access beyond the Manhood Peninsula relies on one main road (the A286) or country lanes that are unsuitable to accommodate significant increases in traffic.
- 7.4. The Employment Land Review Update (CD-12) demonstrates that, notwithstanding existing local plan allocations, it is very difficult to deliver further employment in East Wittering/Bracklesham due to a lack of market demand the premises. Further significant residential development could easily spoil the character of the area, through making it more suburban in character and increasing traffic congestion, thereby making it less attractive to visitors attracted to the area for tourism and potentially reduces existing employment levels.
- 7.5. Whilst the village has a primary school and access to convenience shopping, access to most comparison retail facilities, hospitals, leisure facilities, secondary and further education all requires travel outside the village. Whilst there is a relatively good bus service to the village, other than for local shopping and primary education, walking and cycling is not a viable option. Therefore increasing the amount of development would be contrary to paragraphs 30, 34 and 35 of the National Planning Policy Framework (CD-62).

- 7.6. Options for higher levels of housing were included in the Housing Numbers and Locations consultation (up to 750 homes) and Parish Housing Numbers consultation (350-600 homes for the parish). The SA (CD-03) assesses three options 50-100 homes (broadly equivalent to the Local Plan); 250-300 homes and Over 500 homes. The higher options, whilst having some positive impacts, generate significant negative impacts mainly relating to the environment, travel patterns and access to jobs.
- 7.7. Following consultation on the Parish Housing Numbers (CD-99a & CD-99b) which took place in autumn 2012 the proposed housing numbers for East Wittering/ Bracklesham were reduced from 350-600 homes to 250-300 homes. This reflected Parish Council concerns over the proposed scale of development on the Manhood Peninsula, due to transport constraints, potential environmental impacts and concerns over lack of local employment opportunities. At that time the Environment Agency also expressed concern regarding impacts on water quality at Sidlesham WwTW which may result from major new development (see paragraph 7.11 below).
- 7.8. The Strategic Housing Land Availability Assessment (SHLAA) (CD-16) identifies a total of 1,614 potential dwellings from 2014-2029 for East Wittering / Bracklesham Parish. The SHLAA does recognise in paragraph 3.30 that the yields may be affected by issues not currently evident by the high level broad assessment that has been undertaken.
- 7.9. The strategy of the Local Plan: Key Policies Pre-Submission (CD-01) is to focus the majority of new development in the East-West Corridor. The corridor has better transport connections and greater access to facilities when compared to other parts of the Plan area. Within the corridor is Chichester City which is the Plan areas largest and most sustainable settlement. Reference should be made to paragraphs 2.5 of A Balanced Approach to Housing Provision (CD-09) which sets out that the focus of new development is in the East-West Corridor. While paragraph 2.6 sets out the reasons for limited amount of growth on the Manhood Peninsula
- 7.10. Paragraph 13.13 of the Local Plan: Key Policies Pre-Submission (CD-01) sets out that the requirement for 100 homes at East Wittering / Bracklesham is modest in scale due to the traffic and transport issues affecting the Peninsula, capacity constraints at the Sidlesham WwTW and potential impacts on local designated sites.
- 7.11. <u>Traffic and transport issues:</u> It is recognised that the Manhood Peninsula has poor road access with the need to cross the busy A27 to access Chichester (and beyond) for higher order services and employment.
- 7.12. <u>Capacity Constraints at Sidlesham WwTW:</u> In the paragraph A.11 of Appendix of A Balanced Approach to Housing Provision (CD-09) Southern

Water acknowledge the potential for Sidlesham Wastewater Treatment Works to accommodate 1,000 homes. The Environment Agency states that the WwTW is at the current accepted Best Available Technology. In addition the EA is considering the potential impact of nitrogen discharged from the WwTW on Pagham Harbour. It is possible that a quality improvement scheme may be introduced in the future to address this. There is therefore limited opportunity to increase the capacity beyond the existing permit.

- 7.13. It should be noted that the potential capacity for an additional 1000 homes to drain to the Sidlesham WwTW is for the whole of the Manhood Peninsula and not just for East Wittering / Bracklesham as it serves other settlements on the peninsula.
- 7.14. Potential impact on local designated sites: due to the close proximity of Chichester Harbour, Pagham Harbour and the Medmerry realignment there is concern at the potential harm development may have in the area. Reference should be made to Towards Integrated Coastal Zone Management on the Manhood Peninsula (CD-84a and b) which sets out the particular challenges facing the Manhood Peninsula.
- 7.15. The evidence base demonstrates that due to the constraints on the Peninsula any significant increase in the amount of development at East Wittering/Bracklesham would require a re-evaluation of the evidence to ensure that development would be deliverable and sustainable.
- 7.16. The local community are concerned about the sustainability of additional development in East Wittering/Bracklesham. A consortium of parish councils has submitted further detailed evidence and this is appended to this statement for the Inspector's consideration (Appendix 8A).

The Planning Inspectorate 4/06A Kite Wing Temple Quay House 2 The Square Bristol BS1 6PN

29 August 2014

Dear Inspector,

Case Ref: Chichester District Council Local Plan Hearing

Note: The contents of this letter reflect the views of the Consortium of Western Manhood Parishes composed of the following bodies:

East Wittering & Bracklesham Parish Council Earnley Parish Council Birdham Parish Council West Wittering Parish Council Donnington Parish Council West Itchenor Parish Council Apuldram Parish Meeting

We wish to present evidence to support the requirement in the submission Local Plan for 100 homes in East Wittering/Bracklesham per Matter 8, Item 7 of your Matters and Issues document. We note that the developer Wates have put in a representation to increase this number to 500 homes (Comment ID LPPS47 and ID LPPS39). We have good reasons to believe that this large increase is not justified by the evidence.

The village of East Wittering/Bracklesham is a sizeable seaside resort (population 4,658 per the 2011 census) at the southern end of the Manhood Peninsula, approximately 7 miles from Chichester to the north. To the west and east respectively are the other main seaside resorts of West Wittering and Selsey. The whole area is very dependent on tourism. Its peninsula nature means that the Manhood has very limited road accessibility, with only two routes leading north off the peninsula, only one of which is an A road:

- 1)The B2179 from West Wittering and the B2198 from East Wittering/Bracklesham join at Birdham with the A286 which then joins the east–west A27 just south of central Chichester (the Stockbridge Rd roundabout);
- 2) The B2145 from Selsey either joins the A286 via the B2201 at the Selsey Tram roundabout at Donnington or joins the A27 just south of the eastern side of Chichester at the Whyke Rd roundabout.

Although there is a main railway station in central Chichester, there is no railway on the Manhood. There are however two bus services, running from central Chichester to and from the Witterings and to and from Selsey.

The principal point we wish to make is that the A27 junctions improvements at the A286, which has been agreed with the Highways Agency as sufficient mitigation to allow the Local Plan proposed housing allocations to go forward, will have insufficient capacity to accommodate the full Local Plan traffic without extensive queuing and delays. To allow the Local Plan allocation for East Wittering/Bracklesham to increase from 100 to 500 will only make this situation significantly worse. Because of the congestion going south on

the A286, caused by northbound traffic, any proposed changes to the Selsey Tram roundabout will be ineffective

Please see attached a brief statement from our transport consultancy firm, Bellamy Roberts LLP, confirming this situation. We will be gathering detailed evidence to support the case.

The Evidence:	
a. Statement from ⁻	Transport Consultant

Our detailed position primarily revolves around three propositions:

1. That there are limited job opportunities on the Manhood Peninsula.

The Local Plan states that "The local economy is heavily dependent on tourism, agriculture and horticulture, resulting in relative lack of employment opportunities with many local jobs seasonal and poorly paid." (Page 127, section 13.1). The nearby city of Chichester with its large trading estates has many more job vacancies. Chichester is the county town for West Sussex and therefore, besides the District Council offices, it is also the seat of West Sussex County Council. The city has a university, a large hospital with an A&E department and one of the largest Further Education Colleges in the South. All of these bodies are major local employers. We have conducted two week long surveys of job vacancies from 7 different sources and we analysed these jobs by location, salary, nature of the post, whether it was full or part time, permanent or temporary. In each survey we analysed over 500 vacancies, but we found few for the Manhood, a total of 3 for East Wittering/Bracklesham but nearly two hundred for Chichester and its environs. The District Council's own Employment Land Review (Update 2013) came to the conclusion that the "commercial demand for new employment sites in East Wittering/Bracklesham is expected to be relatively modest" (page 95, section 6.99). This is mainly attributed to the difficult location some distance south of the A27. To date no new employment sites have been identified.

The Evidence:

- b. A survey of trading and industrial estates
- c. The results of two major job vacancy surveys c(i) & c(ii)
- 2. Chichester has many facilities lacking on the Manhood Peninsula.

The cathedral city of Chichester has a great number of attractions, including its nationally renowned Festival Theatre, a large number of shops in its pedestrianised centre (including several "destination" stores), and many and varied leisure facilities, including two cinemas, one a Multiplex 10 screen cinema. The nearby Goodwood estate is the centre for the Goodwood racecourse and motor racing track, which hosts "Glorious Goodwood" and the "Festival of Speed", amongst many other spectator events. Chichester and its surrounding area has several large Secondary Schools (most taking pupils up to age 18) as compared with only one on the Manhood at Selsey, which only takes pupils up to age 16 (excepting a very small temporary Free School at the northern end of the manhood that again only takes pupils up to age 16). However, this Secondary School is relatively small, rated "inadequate" by Ofsted (the lowest grade) and is moreover, further to travel from East Wittering/Bracklesham than the schools in Chichester. The Local Plan states that "the Peninsula relies strongly on Chichester city for employment, shopping, entertainment and other key facilities, which increases the need to travel" (page 127, section 13.1).

The evidence:

- d. A survey of Leisure and Sports facilities
- e. A survey of Educational facilities
- f. A survey of Shopping facilities
- g. A survey of Personal Business facilities

The definitions for these four types of travel destination are taken from the National Travel Survey for England 2013. Together they make up 66% of all trips taken.

3. The Manhood Peninsula has severe traffic congestion issues.

The Local Plan refers to "Poor road accessibility and problems of traffic congestion resulting from the limited road connections to the north, the junctions on the A27 Chichester Bypass, and the impacts of summer holiday traffic" (Page 127, section 13.1). During warm summer days the roads on and off the Manhood can reach gridlock where vehicles are travelling to and from the popular beaches, particularly the National Trust beach at West Wittering. In addition, West Sussex County Council's own Transport Plan 2011-26, in its section on the Manhood, refers to "pressure being placed on the highway network as many use the car to commute causing congestion during peak hours" (page 53). There are no plans to materially improve or upgrade the road network on the Manhood itself. It is important to point out that during the last 2 years over 530 currently unbuilt or unoccupied homes on the Manhood have been granted planning permission (see evidence h).

There is also an issue with air quality; the area around the junction with the A27 is an AQMA which has failed the government's air quality standard for nitrogen dioxide.

There is evidence to suggest that local people use the narrow and winding lanes to the east of Bracklesham in order to avoid parts of the main road, particularly during the busy summer months. These lanes have no pavements or footways and are regularly used by horse-riders, cyclists and walkers. The lanes start at Clappers Lane, which leads through the Earnley Conservation Area. In the Conservation Area plan, the County and District Councils have both signed up to reducing traffic through the Conservation Area.

The evidence:

h. Unbuilt or unoccupied homes with planning permission

Genesis Town Planning, on behalf of the developer Wates, will present evidence to you to support their case for 500 homes in Bracklesham/ East Wittering. We can only anticipate the case they will make by reference to their planning application for 160 homes on Clappers Lane. Partly owing to the objections on traffic grounds made by the LHA, and partly on general sustainability, particularly the lack of local employment, Chichester District Council Planning Committee resolved to contest the application at the appeal inquiry due to commence on 29 October. The Consortium of Western Manhood Parishes will also be represented at the inquiry as a Rule 6 party. The consortium have retained the services of an independent transport consultant.

In their planning application, and in particular the Transport Assessment, Wates have made the following claims which we believe to be unjustified:

1. That some 41% of new residents will get jobs locally on the Manhood, with 28% in East Wittering alone, marginally more than Chichester itself. For the 160 home development, on

reasonable assumptions of jobs per household and allowing for some home working, this comes to about 50 new jobs for East Wittering alone and about 75 for the Manhood in total. They base this conclusion on the 2001 census distance travelled to work data (a question not repeated in the 2011 census). However this only holds if the growth in employment since 2001 has matched the growth in resident population. What has actually happened is that the population has grown by some 20% whereas the number of people working in Bracklesham/East Wittering (no matter where they live) has fallen marginally by 2%. This was pointed out to us by our transport consultant (Bellamy Roberts LLP) in a report we commissioned on the developer's Transport Assessment. The consultant concluded: "It is self-evident that if the working population has increased, but the number of jobs available in the local area has remained at, or about the same, then the number of people commuting out of that local area, as a proportion of the total workforce, must increase" (Section 3.3, page 3).

Furthermore, the area has recently lost its major local employer, Cobham Aerospace, with the loss of approximately 100 jobs. The developer referred to the proximity of this employer as a factor in favour of its planning application. There have also been other recent job losses in the locality, including the closure of Southerly Yachts (50 jobs lost), Earnley Concourse, Castle Printers, Bramber Nurseries and Northshore Yachts.

Please also see our evidence b. & c., which shows the very limited number of job vacancies and employers on the Manhood compared to Chichester and further afield.

- 2. In their traffic distribution assumptions Wates also claim that some 71% of non-commuting trips will be local trips, leaving only 29% for trips to Chichester and beyond. They base this conclusion on a simple gravity model using population centres. Our transport consultant has described this methodology as "wholly inappropriate" (section 2.4, page 2), ignoring as it does the purpose of these trips and where the facilities and attractions are actually located. The city of Chichester may be a small city compared to most, but it has many attractions and facilities. Please see the results of our comprehensive surveys evidence d., e., f. and g. It is also worth pointing out that the peninsula nature of the Manhood makes the simple population gravity model results particularly unreliable. Our transport consultant is remodelling the traffic distribution assumptions based on the results of our surveys. We fully expect the number of trips within the Manhood to decrease relative to those to Chichester and its environs.
- 3. Wates believe that few or no new residents will use the rural lanes to the east of Bracklesham through the Earnley Conservation Area. Our survey evidence of local residents indicates the contrary. During the busy summer months local residents use these lanes to avoid the congested main road. The traffic counts referred to in the developer's Transport Assessment were taken on selected days during the period from November 2013 to March 2014.
- 4. The developer's Transport Assessment states that there is a good quality bus service in the area and it is referring to the bus route 52/53. However, the last hourly bus leaves Chichester at 10.18pm on Friday and Saturday, with no buses in the evening during the week after 8.18pm and very limited service on Sundays with no evening service. The developer's main planning document refers to the popularity of Chichester Gate (including a Multiplex cinema and a bowling alley) especially with young people; however people can get there by bus but not get back they generally won't want to leave at 10.00 on a Friday or Saturday evening. The result will be more car traffic to and from Chichester. The Local Plan states that the local bus services, although "reasonably regular" are "susceptible to cutbacks and are limited in terms of evening and weekend services" (page 127, section 13.1).
- 5. In their Pre Submission Local Plan Representations document (section 4.12), Wates partly justify their proposal to increase the housing allocation in Bracklesham/East Wittering to 500

homes by reference to the local affordable housing need. They refer specifically to the 150 households on the local housing register, and on an assumption of 30% affordable units for all new developments, this means, they contend, that 500 dwellings are needed. However Chichester District Council have confirmed that only 39 of the 150 are in priority bands A-C, the rest being in band D with no prioritised need. Moreover, of these 39, 30 have already been allocated new housing in approved development schemes in the parish. It is pertinent to note that approximately 70 residents supported these schemes, but that there is not even one registered letter of support for the further 160 homes planning application made by Wates.

Taking commuting and non-commuting trips together, the developer assumes that only a third of all trips from Bracklesham/East Wittering will involve using or crossing the A27, a figure we believe to be a significant underestimate.

There is some evidence to suggest that additional large scale housing development, with the extra traffic this will bring, may have a damaging impact on existing local businesses. As part of their Neighbourhood Plan, Birdham Parish Council (a parish on the main road just 1.2 miles north of Bracklesham) commissioned a survey of local businesses. The result was that 64% of these businesses commented that heavy traffic, particularly during the summer months, caused serious delays or cancellations for their customers, staff and suppliers. Local caravan park and chalet owners we have spoken to have made similar comments, noting in particular the very unreliable bus service during the busy summer months, a service their customers use. Their customers complain about the increasing problem of traffic congestion and overdevelopment of the area.

In their evidence to the hearing, Wates may well refer to the Planning Inspector's report permitting the 50 dwellings on Beech Avenue, Bracklesham. This is a site immediately south of the site of the planning application for 160 homes already referred to. They refer to this same site in both of their representations on the Local Plan, urging that the site should be included in Policy 24 as a strategic site.

Wates may well quote the Inspector's decision letter as follows:

".. there is no obvious physical reason why adjoining land to the north could not be developed at a future date, and be physically connected to the current appeal site; indeed that is the appellant's clearly stated current intention." (para. 29, page 6).

The developer claims that this supports the contention that the site enjoys a sustainable location. However, we believe this to be misleading and totally disingenuous. It is perfectly clear that the above quote is made in the context of the Inspector rejecting the Council's claim that the whole site had been artificially subdivided and therefore represented "piecemeal" development, contrary to the 1999 Local Plan and criterion 12 of the Facilitating Appropriate Development (FAD) planning document.

The Inspector's very next sentence, not quoted by the developer, is: "But any further proposals are not a matter for me...". The Inspector is also surely correct in concluding that "sustainability, in locational terms, is relative to scale" (para 123, page 29) It is true that the Inspector finds in favour of the 50 dwellings. To get a balanced view, it is best to quote the whole of para 25:

"I conclude that the appeal site, while perhaps <u>sub optimal in terms of its transport sustainability</u>, is by no means "unsustainable". In fact, I consider that it is sustainably located for a housing scheme <u>of its size</u>. <u>Arguably</u>, therefore, the scheme should benefit from the Framework's presumption in favour of sustainable development." (Our underlining).

You can take what you like from this, but is it is clearly not, as the developer seems to misleadingly claim, a green light for a much larger development on an adjacent field with a proposed exit onto rural Clappers Lane and certainly not for increasing the Local Plan housing allocation from 100 to 500.

Although we have focussed on sustainability issues around employment and transport, we would also register our support for the Local Plan strategy document "A Balanced Approach to Housing Provision" (2014). Besides emphasising the issues we have raised in detail in this letter, the strategy document points to other reasons for limiting development on the Manhood Peninsula, including "the potential to harm the flat, open landscape in close proximity to the Chichester Harbour AONB, Pagham Harbour and the undeveloped coast" (section 2.6, page 3). To this it adds the recently completed Medmerry Nature Reserve, the centre of which is less than a mile from Bracklesham. Medmerry is a European compensatory site, a designated SPA and is very likely to achieve SSSI status. As the Council point out, the policy objectives are to follow the principles of Integrated Coastal Zone Management (ICZM), included in their policy document Towards ICZM. As that report stresses, the Manhood Peninsula represents one of the last areas of undeveloped coast between Southampton and Brighton, an asset the NPPF states should be maintained (para 114).

The strategy document also points to the well documented surface water and sewage inundation problems experienced by residents on the Manhood, including East Wittering and Bracklesham. These problems include the inability to flush toilets and use showers and baths (they are many bungalows) as well as sewage inundation in gardens and sometimes inside homes. Although Southern Water state they still have some spare capacity (approximately 3% to 4% or approximately 600 to 700 dwellings) at the Sidlesham WWtW plant, there does appear to exist considerable doubt, principally around the issue of holiday users. There is evidence to suggest that Southern Water may have greatly underestimated this difficult to quantify population, partly because it is extremely difficult to say how long the average holidaymaker will stay. Many of our visitors lease their chalets and caravans and stay for long periods.

All this evidence on the relative dearth of local jobs and facilities matters; it shows that development in excess of the Local Plan proposal could well end up as dormitory settlements, with significantly more residents travelling off the Manhood for work and other purposes than the developer Wates estimates. The impact on what are already congested roads leading up to the A286/B2201 Selsey Tram roundabout and the Stockbridge Road A286/A27 roundabout we, and our transport consultant advising us, contend will be "severe" per paragraph 32 of the National Planning Policy Framework. We believe we can demonstrate this to be the case, even with the implementation of the mitigation measures for the A27 roundabouts proposed as part of the Local Plan.

Thank you for your attention.

CHICHESTER DISTRICT LOCAL PLAN HOUSING ALLOCATIONS IN EAST WITTERING

TRANSPORT STATEMENT

GDB/4536/TS.1 August 2014

G D Bellamy BSc CEng MICE I T Roberts MCIHT

Bellamy Roberts LLP (trading as Bellamy Roberts) is a Limited Liability Partnership registered in England.

Reg No OC303725. Registered Office: Clover House, Western Lane, Odiham, Hampshire RG29 1TU

- 1. Bellamy Roberts are instructed by a Consortium of Parish Councils on the Western Manhood Peninsula with regard to the Consortium's objection to the planning appeal by Wates for a development of 160 dwellings on land at Clappers Lane, East Wittering. We have also been asked to provide advice in relation to the representations of Wates to the Local Plan, to the effect that the housing allocation in the village of East Wittering should be increased from 100 units to 500 units.
- 2. With regard to our work for the Consortium in relation to the Clappers Lane planning appeal, we have carried out a detailed analysis of the Transport Assessment (TA) report submitted by Wates. It is our contention that the TA significantly under-estimates the proportion of traffic generated by the development which will need to access the junction of the A286 with the A27 trunk road at the Stockbridge Road roundabout. At the Clappers Lane 160 dwellings inquiry, we will present evidence to show that significantly more traffic will head off the Manhood than the developer's TA assumes. This is because the TA underestimates local employment opportunities and the attraction of the city of Chichester for other activities, such as shopping, education and leisure.
- 3. However, even on the basis of the submitted TA and subsequent work requested by the Highways Agency, it is evident that the total development allocation in the local plan will cause very substantial overloading and resultant congestion at this junction, notwithstanding major improvement proposals incorporated in the Local Plan and agreed by the Highways Agency.
- 4. The analysis by Wates' consultants shows that in 2031, and using traffic flows forecast in the Chichester Area Traffic Model, there will be traffic queues on the A27 exceeding 400 vehicles per lane and with delays of 20 minutes per vehicle. These queues will extend back through the adjacent junctions at Fishbourne to the west and Whyke Road to the east.
- 5. Similarly, there will be extensive queuing and delays on the A27 in the morning peak, and as a result queues on the A286 northbound from the Manhood Peninsula to the A27 junction will be more than 2 km in length. The northbound

br

queue will extend back through the Selsey Tram junction, thereby creating extensive congestion at that roundabout. Consequently the junction improvements proposed by Wates at the Selsey Tram roundabout will be ineffective due to the junction being blocked by northbound queuing traffic.

- 6. If the housing allocation in East Wittering is increased from the current 100 units to 500 units as Wates request, there will be substantial additional traffic added to the A286 at the A27 junction. The current position is that the agreed junction improvements, intended to mitigate the effects of Local Plan developments, will have inadequate capacity to accommodate the effects of those developments, with resultant extensive traffic congestion. As detailed above, the northbound queues on the A286 will be extensive. Increasing the permitted housing development in East Wittering, to the extent suggested by Wates, will clearly exacerbate what will in any event be significant congestion and delays for all traffic.
- 7. The absence of adequate highway capacity to accommodate properly the existing local plan allocations for development at East Wittering means that a major increase in those allocations, as suggested by Wates, must be unacceptable from the transportation perspective.

Signed:

West of Chichester	15	4%	8.4	Includes Southfields (Bosham) & Polthooks (Fishbourne) Industrial Estates.
North of Chichester	24	7%	10.3	Includes Eastmead Industrial Estate in Lavant.
South of Chichester	17	5%	6.9	Includes Vinnetrow & Donnington Pk Industrial Parks.
TOTAL	336	100%		

COMMENTARY

The above excludes some of the major employers in the city centre: Chichester District Council, West Sussex County Council, St Richards Hospital, Chichester College and Chichester University. This is emphasised by the fact that well over 50% of all the vacancies from our job surveys for Chichester and the Chichester area were from these 5 sources alone.

Secondary Schools ("Around Chichester") includes Barnham, Bognor, Midhurst & Southbourne

						Sub Total	
		<u>Eastern</u>	Sub Total		<u>Around</u>	<u>Non</u>	
<u>Type</u>	Local & West	Manhood	Manhood	Chichester	Chichester	Manhood	<u>Total</u> <u>Comments</u>
<u>Nurseries</u>							
No. of Establishments	1	2	3	11		11	14 Apart from one in Chichester, all rated by Ofsted as "Good" or "Outstanding"
No. of Full Time Equivalent Places	36	71	107	654		654	761
Average Distance (Miles)	0.4	6.6		8.7			
Playgroup Pre School							
No. of Establishments	3	3	6	2		2	8 Many parents take-up part-time places within nurseries.
No. of Full Time Equivalent Places	104	110	214	50		50	264
Average Distance (Miles)	1.6	7.2		7.5			
Primary Schools							
No. of Establishments	3	4	7	8		8	15 Apart from 2 (in Chichester & Eastern Man.), all rated by Ofsted as "Good" or "Outstanding"
No. of Pupils	488	947	1435	1606		1606	3041
Average Distance (Miles)	2.2	6.2		7.5			
Secondary Schools							
No. of Establishments	0	1	1	. 3	4	7	8 The Academy in Selsey (556 pupils) rated "Inadequate" by Ofsted - lowest grade. Two of the three
No. of Pupils	0	556	556	3585	3780	7365	7921 schools in Chichester rated "Requires Improvement", the other (the C of E school) is "Outstanding".
Pupil Intake 2013/14	0	150	150	724	840	1564	1714 Three of the schools "Around Chichester" are rated "Good" and one "Outstanding".
Average Distance (Miles)		7.7		6.8	14.4		

In addition Chichester College (Ofsted rating 1 or "Outstanding & 6.9 miles from Clappers Lane) offers the following:

Age 14 Plus 3732 Full Time Places
Age 14 Plus 10897 Part Time Places
Adult Vocational Courses Offered 83 Includes Evening Classes

Non-vocational courses are included within Leisure as per National Travel Survey definitions

Note 2. There is a private fee paying school in Chichester (The Prebendal) taking pupils from aged 3 to 13 years.

COMMENTS

There are a limited number of nursery places on the Manhood.

Because of its distance and reputation, it is unlikely that many parents would chose the secondary school at Selsey. The conclusion must be that virtually all secondary school pupils will travel off the Manhood.

Evening classes are almost entirely in Chichester.

Note 1. There are 3 Holiday Clubs in Chichester and one in Itchenor ("Local & West")
